COUNCIL OF EUROPE ANNUAL PENAL STATISTICS – SPACE I

2008 SURVEY ON PRISON POPULATIONS

by Marcelo F. AEBI and Natalia DELGRANDE¹

Survey Background

The SPACE I data presented below were obtained by means of a revised version of the questionnaire introduced in the 2004 survey (Document PC-CP (2008) 07). The main goal of the questionnaire introduced in 2004 was to include some questions in order to clarify precisely what is being counted in the statistics of each country. The answers to these questions suggest that cross-national comparisons of prison population rates must be conducted cautiously as the categories included in the total number of prisoners vary from country to country. The same is true for cross-national comparisons of deaths and suicides in penal institutions as well as of staff working in penal institutions.

In order to increase the reliability of the survey and allow more accurate comparisons between the Member States of the Council of Europe, a few modifications were introduced in the 2008 survey.

- In former SPACE questionnaires there was a slight difference between the French and the English definitions of *assault and battery*. While the English version referred to *assault*, the French version referred to *assault and battery (coups et blessures volontaires)*. This problem has been solved and both versions refer now to *assault and battery*.
- Former SPACE questionnaires referred to *rape*, but an analysis of the answers received suggested that some countries were also including other sexual offences under that heading. As a consequence, sexual offences have now been divided in two categories: *rape* and *other types of sexual offences*.
- Some clarifications were introduced for other items such as counting units and reference dates.
- The former category of mentally ill offenders has been divided in three subcategories: non-criminally liable prisoners, mentally ill offenders held in psychiatric institutions, and mentally ill offenders who are held inside special sections of penitentiary institutions.
- The 2008 questionnaire was also translated into Russian. The goal of the translation was to facilitate the completion of the questionnaire and the inclusion of comments on the particularities of the national data, and to increase the number of responses received and the reliability of the information included in them.

Figures on prison population (*stock*) as well as on penitentiary staff relate to **1st September 2008**; while number of entries into penal institutions (*flow*), total number of days spent in them, and incidents (escapes, deaths and suicides) relate to the whole **year 2007**.

¹ Marcelo F. Aebi, Professor of Criminology and Natalia Delgrande, Researcher. Institut de Criminologie et de Droit Pénal, Ecole des Sciences Criminelles, University of Lausanne

The forty-seven Member States of the Council of Europe in 2008 counted fifty-two Prison Administrations under their control. Forty-eight of these Prison Administrations answered the 2008 SPACE I Questionnaire. The following Prison Administrations did not answer the survey: **Albania, Bosnia and Herzegovina (Federation level), Montenegro, and Russia.**

- **Albania** and **Bosnia and Herzegovina (Federation level)** were unable to answer the questionnaire due to a lack of human resources to achieve the task.
- **Montenegro** (that became the 47th Member State of the Council of Europe on May, 11, 2007) has not yet assigned a national correspondent responsible for answering the SPACE I questionnaire.
- **Russia** did not provide any explanation on the lack of data.

For administrative reasons, data were not available for the following geopolitical entities: Northern Cyprus, Kosovo, Transdniestria, Abkhazia, South Ossetia and Nagorno-Karabakh.

This report includes data on Canadian *federal* facilities. **Canada** is an observer country at the Council of Europe. Canadian figures –than cover only the federal penal institutions– are presented only for information and were not included for the calculations of European averages and indicators.

The majority of countries answered the questionnaire on time, but in some cases the responses arrived only in January and February 2010. At the same time, in special cases the data validation procedure (see below, point E) took more than 8 months. This procedure is essential for the quality of the data included in the survey and it allowed including the latest official figures available, correcting wrong figures, and including additional comments. As the data validation procedure could not be achieved for **Azerbaijan, Belgium, Georgia, and Lithuania**, several figures of these countries are presented between brackets.

A. Prison Populations

Part A of the Survey includes global indicators of prison populations on 1st September 2008 (Section A.1) as well as data on flow of entries, length of imprisonment, escapes and deaths for the whole year 2007 (Section A.2). In order to assure –as much as possible– comparability across countries, some figures are included only in the *raw data* tables. This means that figures that did not seem to fit the definitions used in this questionnaire were not integrated in the tables that include calculations of rates and percentages.

A.1. Global indicators of prison populations on 1st September 2008

The situation of prison populations on a given date ("STOCK STATISTICS") is set in Tables 1 to 11. This indicator varies in time under the influence of the number of entries and releases in/from penal institutions and the length of stays in these institutions.

Table 1: Situation of penal institutions on 1st September 2008

- (a) *Total number of prisoners (including pre-trial detainees);*
- (b) *Prison population rate per 100,000 inhabitants: number of prisoners (including pre-trial detainees) as of 1st September 2008 in relation to the number of inhabitants at the same date (in view of the information available, the figures actually used are the annual estimates of the number of inhabitants)².*
- (c) *Capacity of penal institutions: number of places available in penal institutions.*
- (d) *Prison density per 100 places: number of prisoners (including pre-trial detainees) in relation to the number of places available in penal institutions.*

As a complement to Table 1, we include five supplementary tables and one map.

Table 1.2: Categories included in the total number of prisoners

The goal of this Table is to clarify the categories of persons deprived of liberty that are being counted in the total number of prisoners.

The Table includes the answers (Yes or No) to the question *Does the total number of prisoners include the following categories?*

- (a) *Persons held in facilities that do not depend on the Prison Administration (police stations, non-Ministry of Justice facilities, police isolators or similar facilities);*
- (b) *Persons held in institutions for juvenile offenders;*
- (c) *Persons held in institutions for drug-addicted offenders;*
- (d) *Offenders with psychological and/or psychotic disorders, considered as non-criminally liable by the court, held in psychiatric institutions or hospitals;*

Table 1.2 shows that the categories included in the total number of prisoners vary from country to country. As a consequence, international comparisons of prison population rates, as in Tables 1 and 1.2.a, cannot be regarded as unproblematic, and this must be borne in mind when using these Tables.

² This indicator is sometimes referred to as "detention rate", or "prisoner rate", or "imprisonment rate", but these terms are ambiguous. Therefore the Council of Europe has adopted the term "prison population rate".

- (e) *Offenders with psychological and/or psychotic disorders, held in **psychiatric institutions or hospitals** in order to execute the main or the supplementary sanction (**excluding** sexual offenders);*
- (f) *Offenders with psychological and/or psychotic disorders, held in **especially designed sections inside penal institutions** in order to execute the main or the supplementary sanction (**including** sexual offenders);*
- (g) *Asylum seekers or illegal aliens held for administrative reasons (general);*
- (h) *Asylum seekers or illegal aliens held for administrative reasons in centres especially designed for this type of detention;*
- (i) *Persons serving their sentence under electronic monitoring.*

Table 1.2.a: Situation of penal institutions on 1st September 2008 (adjusted figures)

In this Table, figures from Table 1 are adjusted according to the information provided in Table 1.2. The adjustment consists in excluding –whenever possible– all the categories of Table 1.2 from the total number of prisoners, and recalculating the rate of prisoners per 100,000 inhabitants. Figures from this Table are indicative, and should not be considered as official national data.

Table 1.3: Situation of penal institutions on 1st September 2008 by decreasing prison population rates (non-adjusted and adjusted figures)

In this Table, countries are ordered (decreasing classification) according to their prison population rates per 100,000 inhabitants on 1st September 2008. On the left hand side of the Table, they are classified according to non-adjusted figures, and on the right hand side they are classified according to adjusted figures (see Table 1.2.a). The last column informs about the difference in percentage between adjusted and non-adjusted figures. In order to ensure an appropriate reading of this table, a particular attention must be paid to the explanatory notes of Tables 1 and 1.2.a.

Table 1.4: Evolution of prison populations between 2000 and 2008

This Table presents the total number of prisoners (including pre-trial detainees) and the prison population rate per 100,000 inhabitants on 1st September from 2000 to 2008. Data are taken from the relevant former SPACE I surveys. The Table indicates also the evolution (in percentages) of prison population rates between 2000 and 2008 as well as between 2007 and 2008.

Table 1.5: Year-to-Year Rates of increase and decrease of prison population rates between 2007 and 2008

This Table shows the evolution of prison population rates between 2007 and 2008. Countries are classified in three categories according to the increase or decrease of their prison population rates between 1st September 2007 and 1st September 2008:

- (a) *Increase of more than 5%;*
- (b) *Between –5% and +5%;*
- (c) *Decrease of more than 5%.*

Map 1: Prison population rates per 100,000 inhabitants on 1st September 2008

This map presents the prison population rates in each Member State of the Council of Europe and allows a visual comparison of the official figures (non-adjusted) for the whole European geographical area.

Table 2: Age structure of prison population on 1st September 2008: general breakdown by categories of age:

- (a) *Less than 14 years*
- (b) *From 14 to less than 16 years;*
- (c) *From 16 to less than 18 years;*
- (d) *From 18 to less than 21 years;*

- (e) From 21 to less than 25 years;
- (f) From 25 to less than 30 years;
- (g) From 30 to less than 40 years;
- (h) From 40 to less than 50 years
- (i) From 50 to less than 60 years
- (j) From 60 to less than 70 years
- (k) From 70 to less than 80 years
- (l) 80 years and over

Table 2.1: Age structure of prison populations on 1st September 2008: minors and persons between 18 and 21 of age:

- (a) Prisoners under 18 years of age (including pre-trial detainees): number and percentage;
- (b) Prisoners between 18 and 21 years of age (including pre-trial detainees): number and percentage.

Map 2: Breakdown of the age of criminal responsibility and percentages of prisoners less than 18 years of age in European countries

This map shows the minimum age of criminal responsibility across Europe and shows the percentage of juveniles held in penal institutions in each country.

Table 3: Female and foreign prisoners on 1st September 2008

- (a) Female prisoners (including pre-trial detainees): number and percentage;
- (b) Of which: Female pre-trial detainees;
- (c) Female foreign prisoners.
- (d) Foreign prisoners (including pre-trial detainees): number and percentage;
- (e) Of which: Foreign pre-trial detainees: number and percentage of foreign prisoners who are pre-trial detainees.

Table 4: Legal status of prison populations on 1st September 2008 (numbers)

- (a) Untried prisoners (no court decision yet reached);
- (b) Prisoners convicted but not yet sentenced;
- (c) Sentenced prisoners who have appealed or who are within the statutory limits for doing so;
- (d) Sentenced prisoners (final sentence);
- (e) Other cases;
- (f) Total.

Table 5: Legal status of prison populations on 1st September 2008 (percentages and rates)

Four indicators have been selected as a basis for comparing the situation of the prison populations across Europe:

- (a) Percentage of prisoners not serving a final sentence on 1st September 2008 (often inaccurately referred to as percentage of unconvicted prisoners): the number of prisoners whose sentence is not final, present at that date, expressed as a percentage of the total number of prisoners at the same date;
- (b) Rate of prisoners not serving a final sentence per 100,000 inhabitants on 1st September 2008: the number of prisoners whose sentence is not final, present at that date, in relation to the number of inhabitants at the same date – expressed per 100,000 inhabitants.

When there is no data available under heading (c) "sentenced prisoners who have appealed or who are within the statutory time limit for doing so" of Table 4, without any further information being provided, it is assumed that prisoners in that situation are included among those under heading (d) "sentenced prisoners, final sentence". In that case, both indicators are presented between brackets and must be interpreted cautiously.

In order to calculate indicators (a) and (b), the number of prisoners not serving a final sentence is obtained by adding headings (a), (b), (c) and (e) of Table 4.

(c) *Percentage of untried prisoners (no court decision yet reached) on 1st September 2008:* the number of untried prisoners (not yet convicted), present at that date, expressed as a percentage of the total number of prisoners at the same date;

(d) *Rate of untried prisoners (no court decision yet reached) per 100,000 inhabitants on 1st September 2008:* the number of untried prisoners (not yet convicted), present at that date, in relation to the number of inhabitants at the same date – expressed per 100,000 inhabitants.

When there is no data available under heading (b) "prisoners convicted but not yet sentenced" of Table 4, without any further information being provided, it cannot be excluded that prisoners in that situation are included among those under heading (a) "untried prisoners (no court decision yet reached)". In that case, both indicators are presented between brackets and must be interpreted cautiously.

In order to calculate indicators (c) and (d), only prisoners under heading (a) "untried prisoners (not yet convicted)" of Table 4 are taken into account.

Table 6: Breakdown of sentenced prisoners (final sentence) on 1st September 2008, by main offence (numbers)

Table 7: Breakdown of sentenced prisoners (final sentence) on 1st September 2008, by main offence (percentages)

Tables 6 and 7 present the breakdown of prisoners with final sentence – those under heading (d) of Table 4 – according to the main offence for which they were convicted. The following breakdown is used:

- (a) *Prisoners sentenced for homicide (including attempts);*
- (b) *Prisoners sentenced for assault and battery;*
- (c) *Prisoners sentenced for rape;*
- (d) *Prisoners sentenced for other types of sexual offences;*
- (e) *Prisoners sentenced for robbery;*
- (f) *Prisoners sentenced for other types of theft;*
- (g) *Prisoners sentenced for drug offences;*
- (h) *Prisoners sentenced for terrorism*
- (i) *Prisoners sentenced for organised crime*
- (j) *Prisoners sentenced for other offences;*
- (k) *Total.*

Table 8: Breakdown of sentenced prisoners (final sentence) on 1st September 2008, by length of the sentence (numbers)

Table 9: Breakdown of sentenced prisoners (final sentence) on 1st September 2008, by length of the sentence (percentages)

Tables 8 and 9 present the breakdown of prisoners with final sentence – those under heading (d) of Table 4 – according to the length of the sentence imposed on them. The following breakdown is used:

- (a) *Prisoners sentenced to less than one month;*
- (b) *Prisoners sentenced to one month to less than three months;*

- (c) Prisoners sentenced to three months to less than six months;
- (d) Prisoners sentenced to six months to less than one year;
- (e) Prisoners sentenced to one year to less than three years;
- (f) Prisoners sentenced to three years to less than five years;
- (g) Prisoners sentenced to five years to less than ten years;
- (h) Prisoners sentenced to ten years to less than twenty years;
- (i) Prisoners sentenced to twenty years and over;
- (j) Prisoners sentenced to life imprisonment;
- (k) Prisoners sentenced to death.

Table 10: Breakdown of sentenced prisoners (final sentence) on 1st September 2008, by length of the sentence (cumulative percentages)

This Table presents the breakdown, expressed in cumulative percentages, of prisoners with final sentence – those under heading (d) of Table 4 – according to the length of the sentence imposed on them. The following breakdown is used:

- (a) Percentage of prisoners sentenced to less than one year;
- (b) Percentage of prisoners sentenced to one year and over (fixed-term sentence);
- (c) Percentage of prisoners sentenced to three years and over (fixed-term sentence);
- (d) Percentage of prisoners sentenced to five years and over (fixed-term sentence);
- (e) Percentage of prisoners sentenced to ten years and over (fixed-term sentence);
- (f) Percentage of prisoners sentenced to fixed-term sentences;
- (g) Percentage of prisoners sentenced to life imprisonment;
- (h) Percentage of prisoners sentenced to death.

Table 11: Breakdown of prisoners sentenced to less than one year (final sentence), on 1st September 2007, by length of the sentence (percentages)

This Table presents the breakdown, expressed in percentages, of prisoners sentenced to less than one year according to the length of the sentence imposed on them. The following breakdown is used:

- (a) Prisoners sentenced to less than one month;
- (b) Prisoners sentenced to one month to less than three months;
- (c) Prisoners sentenced to three months to less than six months;
- (d) Prisoners sentenced to six months to less than one year.

A.2. Flow of entries, length of imprisonment, escapes and deaths in 2007

Tables 12.1 to 15.2 show the number of entries into prison (“FLOW STATISTICS”), the length of imprisonment, and the number of escapes and deaths in penal institutions during the year 2007.

Table 12.1: Flow of entries to penal institutions in 2007

- (a) *Total number of entries to penal institutions in 2007.* This indicator is usually known as “flow of entries”;
- (b) *Rate of entries to penal institutions per 100,000 inhabitants:* the number of entries in 2007, in relation to the average number of inhabitants during the same period;
- (c) *Entries before final sentence: number and percentage.*

Figures relate to the number of events (entries) and not to the number of individuals. The same individual may enter prison several times in the same year for the same case. This applies, for instance, to an individual who is placed in pre-trial detention during year n (first entry), released by the prosecution authorities at the pre-trial investigation stage, tried without being re-detained, convicted and sentenced to a term of imprisonment exceeding the period of pre-trial detention, and re-imprisoned during the same year n to serve the remainder of the sentence (second entry). A fortiori, the same individual may enter prison several times in the same year for different cases.

In the questionnaire, countries were asked to meet the following definition of *entry*:

THE TERM “ENTRY” REFERS TO ALL ENTRIES INTO PENAL INSTITUTIONS, EXCEPT IN THE FOLLOWING SITUATIONS:

- ENTRY FOLLOWING TRANSFER FROM ONE PENAL INSTITUTION TO ANOTHER;
- ENTRY FOLLOWING THE PRISONER’S REMOVAL FROM THE INSTITUTION IN ORDER TO APPEAR BEFORE A JUDICIAL AUTHORITY (INVESTIGATING JUDGE, TRIAL COURT, ETC);
- ENTRY FOLLOWING PRISON LEAVE OR A PERIOD OF AUTHORIZED ABSENCE;
- ENTRY FOLLOWING AN ESCAPE, AFTER RE-ARREST BY THE POLICE.

Only entries of untried prisoners (not yet convicted), prisoners convicted but not yet sentenced, or sentenced prisoners who have appealed or who are within the statutory time limit to do so are recorded under (c). This figure therefore corresponds to a subset of the entries recorded under (a). Entries for pre-trial detention are included.

Table 12.2: Additional categories of the Flow of entries to penal institutions in 2007

This Table includes three additional categories of entries that were not included Table 12.1:

- *Entries following transfer from one penal institution to another*
- *Entries following transfer from a foreign country to the country responding the questionnaire*
- *Entries following an escape, after the re-arrest by the police*

Table 13.1: Indicator of average length of imprisonment in 2007, based on the total number of days spent in penal institutions

- (a) *Total number of days spent in penal institutions in 2007;*
- (b) *Average number of prisoners in 2007: $b = a / 365$;*
- (c) *Total number of entries to penal institutions in 2007 (flow of entries) = heading (a) of Table 12;*
- (d) *Indicator of average length of imprisonment expressed in months (D): quotient of the average number of prisoners in 2006 (P) by the flow of entries during that period (E), multiplied by 12 (months): $D = 12 (P / E)$.*

This kind of data is usually prepared by the departments responsible for prison budgets and is used to calculate the average daily cost of imprisonment.

The figure under heading (a) corresponds to the total number of days spent in penal institutions by all persons placed in detention for at least one day during the reference year (2007). This may be time spent in pre-trial detention or time spent serving a prison sentence, or may even correspond to other circumstances (detention for failure to pay a fine, for instance). No distinction is made here between those categories.

By dividing the number of days of imprisonment by 365 (366 in leap years) we obtained the "average number of prisoners in the year" or the number of "prisoner-years" (b), which constitutes probably the best possible indicator of the average number of prisoners present in the year.

Table 13.2: Indicator of average length of imprisonment in 2007, based on the total number of days spent in penal institutions

As some countries did not provide data regarding the total number of days spent in penal institutions in 2007 –heading (a) of Table 13.1– and others provided figures that did not seem reliable (see Notes to Table 13.1), we have added Table 13.2 (Indicator of average length of imprisonment in 2007, based on the total number of prisoners on 1st September 2007). In this Table, the indicator of the average length of imprisonment has been computed by using the total number of prisoners on 1st September 2007 (source: SPACE 2007) instead of the total number of days spent in penal institutions. We have also used this indicator to work out other figures presented in Tables 14 and 15 (escape rate, mortality rate and suicide rate).

Table 14: Escapes of prisoners in 2007

The Table includes two types of escapes:

- (a) *Escapes by prisoners (convicted prisoners or pre-trial detainees under the supervision of the prison administration) from a closed penal institution or during an administrative transfer (for example, to or from a court, another penal institution, or a hospital).*

In the SPACE questionnaire used for this survey it is clearly indicated that the counting unit is the *person*. In the event of a group breakout, the number of escapes is equal to the number of inmates involved.

Relating the number of escapes to the total number of prisoners on 1st September 2007 (used here as an estimate of the *average number of prisoners*) provided in SPACE 2007 we obtain the *rate of escapes per 10,000 prisoners*: **10,000 X (a / total number of prisoners on 1st September 2007)**.

- (b) *Other forms of escape (absconding or running off):* Examples are escapes from open institutions (such as work farms) or from semi-detention, and escapes during an authorised short-term absence (or leave) from all kinds of institutions (including closed institutions).

We have not worked out the rate here, as that would lead to calculate the ratio of escapes (other forms) to the average number of prisoners without taking account of the proportion of inmates placed in "open institutions".

Table 15.1: Deaths in penal institutions in 2007 (including suicides)

- (a) *Total number of deaths in penal institutions;*
 (b) *Number of suicides;*
 (c) *Suicides as a percentage of total deaths: 100 (b / a)*

Relating the total number of deaths in prison (a) and the number of suicides in prison (b) to the total number of prisoners on 1st September 2007 (used here as an estimate of the *average number of prisoners*) provided in SPACE 2007 we obtain respectively:

- (d) Mortality rate per 10,000 prisoners: **10,000 X (a / total number of prisoners on 1st September 2007)**;
- (e) Suicide rate per 10,000 prisoners: **10,000 X (b / total number of prisoners on 1st September 2007)**.

Deaths of convicted prisoners and pre-trial detainees while in hospital are included in this Table.

Table 15.2: Types of deaths and suicides included in Table 15.1

The goal of this Table is to clarify which types of suicides are being counted. The Table includes the answers (Yes or No) to the following questions:

- (a) Does data include prisoners who died or committed suicide in prison hospitals?
- (b) Does data include prisoners who died or committed suicide in community hospitals?
- (c) Does data include prisoners who died or committed suicide outside prison (during a prison leave or a period of absence by permission)?

Table 16: Average amount spent per day for detention of one person (pre-trial and serving a sentence) in penal institutions –2007 year (in Euros)

Figures included in this Table should allow comparisons of the costs of detention across Europe. No particular definition has been used in the questionnaire; therefore national particularities (e.g. the way in which costs are calculated) are indicated in the notes to the Table. Figures in national currencies other than Euro have been converted into Euro.

B. Prison Staff

Part B of the Survey includes figures related to persons working in prisons or, more generally, in the penitentiary system. The Survey makes a distinction between people working under the control of the National Prison Administrations and people working under the control of any other authority.

Data on the staff employed by the Prison administrations are presented without distinction between full-time and part-time staff. Full-time equivalents have been used as the counting unit for these tables.

Table 17: Full-time and part-time staff working in penal institutions *on the basis of full-time equivalents* on 1st September 2008 (numbers)

Table 18.1: Full-time and part-time staff working in penal institutions on 1st September 2008: *on the basis of full-time equivalents* (percentage)

Table 18.2: Full-time and part-time staff working **INSIDE** penal institutions on 1st September 2008: *on the basis of full-time equivalents* (percentage)

Tables 17 to 18.2 describe the situation of staff working in penal institutions on 1st September 2008. The goal of these Tables is to count all staff engaged by the prison authorities. Respondents were asked to exclude persons working in penal institutions but not employed by the prison authorities (in some countries this applies to doctors, teachers or perimeter guards). Such employees are included in Table 19.

Tables 17 and 18.1, 18.2 are structured with respect to the following categories:

- (a) Total
- (b) Management: Management staff;
- (c) Custodial: Custodial staff excluding staff already included in (b);
- (d) Treatment: Treatment staff (including medical staff, psychologists, social workers, teachers/educators, etc.), excluding staff already included in (b) or (c);
- (e) Workshops: Staff responsible for workshops or vocational training, excluding staff already included in (b), (c) or (d);
- (f) Administrative: Administration staff, excluding staff already included in (b), (c), (d) or (e).
- (g) Other staff

Respondents were asked to calculate the number of staff working part time on the basis of "full-time equivalents". This means that when two people work half the standard number of hours, they count for one "full-time equivalent". One half-time worker should count for 0.5 of a full-time equivalent.

Table 19: Staff working in penal institutions but not employed by the Prison Administration –on 1st September 2008

This Table presents the staff employed by institutions that are *not* under the control of the Prison Administration (i.e. staff not employed by the Prison Administration), but that is involved in the security, treatment, training or other activities developed in penal institutions placed under the prison administration authority.

In some countries these categories do not exist. In others, doctors, teachers and perimeter guards may sometimes be employed by institutions that are not under the control of the prison authorities (for instance health authorities, departments of the Ministries of Education, Interior or Justice, or private security).

Table 20: Supervision of prisoners

- (a) Total number of prisoners at 1st September 2008: see Table 1.
 (b) Total number of custodial staff at 1st September 2008: see Table 17.
 (c) Rate of supervision of prisoners (number of prisoners per custodian): $c = a / b$
 (d) Total number of treatment, education staff, and staff responsible for workshops.
 (e) Rate of supervision of prisoners (number of prisoners per other employee): $e = a / d$.

C. Conventions and Statistical Measures

C.1. Conventions used:

***	The question is irrelevant; the item refers to a concept not found in the penal system of the country concerned.
0	The number is 0 but the concept exists in the penal system of the country concerned.
...	No figures available, but the concept exists in the penal system of the country concerned.
(number)	When the data are shown in brackets this means that they are not strictly comparable with the data requested by SPACE I questionnaire. For example, this applies to items whose definition is not the same as the one used in the SPACE questionnaire. Or when the total number of analysed figure is less or equal to 10 individuals.
	When the questionnaire box is left blank or a symbol is used, whose meaning is not explicit (for example "/" or "-"), we leave the box blank.

All cases of divergence and additional comments provided by national correspondents have been grouped and explained in the notes to the Tables.

C.2. Measures of central tendency:

In Tables containing rates or percentages, we have used the following measures to describe the distribution of the data:

- **Mean:** the arithmetic mean is the outcome of dividing the sum of the data supplied by the total number of countries. The mean is sensitive to extreme values (very high or very low).
- **Median:** the median is the value that divides the data supplied by the countries concerned into two equal groups so that 50% of the countries are above the median and 50% are below it. The median is not influenced by very high or very low values.
- **Minimum:** the lowest recorded value in the given column of the Table.
- **Maximum:** the highest recorded value in the given column of the Table.

For reasons of accuracy we have calculated the mean and median values from the original database, which contains all the decimals not presented in the tables. Readers who rework the calculations from the data in the tables - which only contain one or two decimals - will therefore obtain slightly different results than ours.

D. Demographic Data

The rates of imprisonment have been calculated using demographic data (annual estimates of total population of each European country) for 2008, taken from the U.S. Census Bureau, International Data Base: <http://www.census.gov/ipc/www/idb/idbconf.html> (retrieved on November 23rd, 2009).

Exceptions: When prison population data referred to a different territorial division than demographic data, we have used the following sources:

- **Bosnia and Herzegovina (Federation of Bosnia and Herzegovina):** Demographic data are mid-2008 estimates (column “present population”). Data were retrieved from the Website of the Federal Office of Statistics (provisional data, nowadays not included in the annual report), available at: <http://www.fzs.ba/Dem/Vital/VitalnaEngl.htm> (retrieved on November 23rd, 2009).
- **Bosnia and Herzegovina (Republika Srpska):** Demographic data are mid-2008 estimates. (“Demographic statistics. Statistical Bulletin” no. 12, Republika Srpska Institute of Statistics, Banja Luka, 2008, p. 17), available at: <http://www.rzs.rs.ba/PublikDemENG.htm> (retrieved on November 23rd, 2009).
- **Cyprus:** Demographic data used for this report refers to the territory of the Republic of Cyprus. This figure was retrieved on March 14th, 2010 from the Website of the Statistical Service of the Republic of Cyprus (“Population by Age and Sex” Excel file): http://www.pio.gov.cy/mof/cystat/statistics.nsf/populationcondition_en/populationcondition_en?OpenDocument
- **France:** Demographic data include the European territory of France (known as Metropolitan France) as well as the French overseas departments (Guadeloupe, Martinique, Guiana and Reunion, known as DOM or *Départements d’Outre-mer*).
- **Spain (State level and Catalonia):** Demographic data refer to 1st January 2008. Data were retrieved on November 23rd, 2009, available for Spain (State level) and Catalonia at the Website of the National Statistics Institute of Spain: <http://www.ine.es/jaxi/tabla.do>.
 - Indicators for Spain (State Administration) were calculated excluding the Catalanian population.
- **United Kingdom (England and Wales, Northern Ireland, and Scotland):** Demographic data are mid-2008 estimates by National Statistics Online. Data were retrieved on November 23rd, 2009 at:
<http://www.statistics.gov.uk/statbase/Product.asp?vlnk=15106>

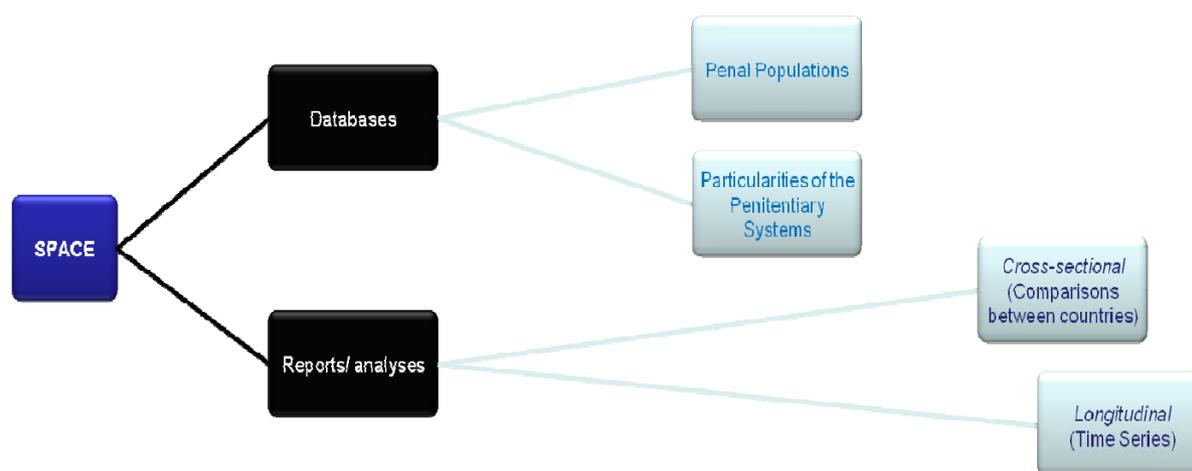

E. Data Validation Procedure

One of the goals of SPACE is to ensure data comparability on two levels: cross-sectional and longitudinal. In order to reach this goal, special attention is given every year to the improvement of data validation techniques. According to the authors of the *European Sourcebook of Crime and Criminal Justice Statistics* (Strasbourg, Council of Europe, 1999), "validation is often the most important –and in many cases the most forgotten– stage of the data collection process". Thus, since the 2002 SPACE I survey, we have introduced a validation procedure for the data received. Such procedure substantially increases the workload of all the individuals and countries involved in the elaboration of SPACE. It also delays the publication of the data. However, we believe that the results obtained –in other words, the improvements to the quality of the data– justify its use.

As part of the validation procedure, we produced a preliminary version of SPACE and a series of control Tables that revealed a number of inconsistencies in the data received from some countries. Those countries were contacted again by means of a telephone call or a personal letter –sent by e-mail or fax– setting out the specific problems encountered in their data. In some cases, it was imperative to translate some information in order to avoid mistakes.

Most of the countries corrected their figures, sent new ones for certain parts of the questionnaire, or indicated the reasons for the divergences identified. Such divergences are mainly due to differences in the national prison statistics systems as well as in criminal justice systems across Europe and are explained in the notes to the relevant Tables.

Nevertheless, despite our efforts to identify errors and inconsistencies, some of them may still remain and others may have been introduced involuntarily during the data processing. Moreover, it has not always been possible to correct the inconsistencies discovered in a totally satisfactory way. In that context, any readers' comments, notes or criticisms are welcomed.

Finally, the authors would like to thank all those who through their support, advice, suggestions or knowledge of specific national features have contributed to the achievement of this report, in particular the national correspondents of each country included in it.

Statistical Tables

1. Prison Populations: State of Prison Populations on September 1st, 2008

This part of the report presents statistical Tables, explanatory notes and maps concerning the general situation in European penal institutions. It also includes data on detention in different types of penal institutions as well as an analysis of the evolution of several indicators of the penitentiary systems across Europe.

I.1. General Notes (including legislative or other measures which directly influence trends in the number of prisoners)

ALBANIA:

Data are not available for this year's report.

ANDORRA:

- The Criminal Code and the Code of Criminal Procedure have been modified (they entered into force on October 3, 2008).
- A new Qualified Penitentiary Law entered into force on March 22, 2007.
- A new Law on the Penitentiary Centre Staff entered into force on March 22, 2007.

ARMENIA:

31 individual pardons were accorded. In Armenia the pardon is always an individual measure.

AUSTRIA:

A new law entered into force: **Strafrechtsänderungsgesetz 2008**, BGBl. I Nr. 109/2007, concerning release on parole.

AZERBAIJAN:

- Data relate to 1st January 2009 instead of 1st September 2008
- 260 persons were subjected to a collective pardon in 2008.

BELGIUM:

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

BOSNIA & HERZEGOVINA (BOSNIA AND HERZEGOVINA – FEDERATION LEVEL):

Data are not available for this year's report.

BOSNIA & HERZEGOVINA (BOSNIA AND HERZEGOVINA – STATE LEVEL):

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

BOSNIA & HERZEGOVINA (REPUBLIKA SRPSKA – ENTITY LEVEL):

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

BULGARIA:

- During 2008 there were three changes in the Criminal Code (on February 22, 2008, July 29, 2008 and November, 2008), and two changes in the Code of Criminal Procedure (August 5, 2008 and December 23, 2008)

- There is a new Law on Execution of Sentences that entered into force on June 1, 2008
- 93 pardons, of which: 81 partial and 12 complete. The collective pardons are 4, according to the Vice-President's Decree

CROATIA:

Data relate to 31st December 2008 instead of 1st September 2008

CYPRUS:

- Prison population figures do not include the areas that not under the effective control of the Government of the Republic of Cyprus;
- 434 Collective pardons given by the President of the Republic of Cyprus –a Constitutional Right;
- 754 probation orders issued, of which 399 were combined with community service and used as alternatives to serving a prison sentence.

CZECH REPUBLIC:

- Data relate to 31st December 2008 instead of 1st September 2008;
- Distribution of pornography and keeping of child pornography (sections 205 – 205b of the Criminal Act No. 140/1961 Coll., amended by the Act No. 271/2007 Coll.) – effective since October 1st, 2007;
- Waste of financial interests of the European Communities and participation transferred to him-/herself or to another person or uses thing acquired by an act, which is punishable in the Czech Republic or in another country (the Act No. 140/1961, the Criminal Act, as amended by the Act No. 122/2008 Coll.) - effective since July 1st, 2008;
- 5 Individual pardons were accorded.

DENMARK:

- Act no. 1404 of December 27th, 2008: Improved efforts to prevent pirate copying. Increase of the maximum sentences.
- Act no. 319 of April 28th, 2009: Implementation of The Council of Europe Convention on the Protection of Children against Sexual Exploitation and Sexual Abuse. Necessary changes in the Danish Criminal Act in order to ratify the convention.
- Act no. 501 of June 12th, 2009: Improved efforts to prevent gang crime etc. Increase of the maximum sentences for certain crimes related to illegal possession of weapons. Introduction of minimum sentences for certain crimes related to illegal possession of weapons. Increase of the sentences applied to persons convicted for certain severe crimes committed as part of gang encounters.
- Implementation of Act no. 500 of June 17th, 2008: Improved efforts to prevent illegal possession of firearms or stabbing weapons in public places
- Extension of certain objectives of urgent case consideration (violence, rape etc.) to include certain sentences concerning illegal possession of firearms or stabbing weapons in public places (limited accession to stay of execution of a prison sentence etc.)
- Implementation of Act no. 501 of June 12th, 2009: Improved efforts to prevent gang crime etc.
- Extension of the above mentioned to include sentenced persons, whose sentences the Police has informed the Prisons and Probation Service should be executed without any delay for the sake of the preventive matters of police enforcement. (Limited accession to stay of execution of prison sentences, limited accession to serve a sentence at home under intensive surveillance and control etc.)

ESTONIA:

- Data relate to 31st December 2008 instead of 1st September 2008.

FINLAND:

- Data relate to 1st May 2008 instead of 1st September 2008.
- From June 1st, 2008 the law was changed concerning fine defaulters. Unpaid fines less than 120 Euros or 12 day-fines are no longer converted into imprisonment. It is estimated that this change produced a decrease between 170 and 210 inmates on the daily prison population.
- No collective pardon, Individual pardon by the decision of the Helsinki Court of Appeal, or by the President of the Republic.

FRANCE:

- Data relate to 1st October 2008 instead of 1st September 2008.
- Data relate to the European territory of France (known as *Métropole*) as well as to the French overseas territories (Guadeloupe, Martinique, French Guiana and Reunion, known as DOM or *Départements d’Outre-mer*).

GEORGIA:

- Data relate to the territory of Georgia, without taking into account Abkhazia and South Ossetia;
- 552 amnesties were applied;
- 560 Individual Pardons.

GERMANY:

- Data relate to 31st March 2008 instead of 1st September 2008.
- Act to Reform the Supervision of Conduct and Amend the Provisions on Subsequent Preventive Detention (**Gesetz zur Reform der Führungsaufsicht und zur Änderung der Vorschriften über die nachträgliche Sicherungsverwahrung**) of April 13th, 2007, which extended the scope of application of subsequent preventive detention for adults under very specific circumstances (section 66b para 1 sentence 2 of the Criminal Code [Strafgesetzbuch - StGB]) and for young adults sentenced under general criminal law (section 106 (5) of the Youth Court Act [Jugendgerichtsgesetz – JGG]). This law is likely to affect very few individual cases.

GREECE:

- Changes in criminal law:
 - Act 3674/2008 (art 9 para 3 introduced a new crime: art 292A Criminal Code - crimes against the security of telecommunications. This crime may be punished by imprisonment 1 year minimum to 5 years maximum and financial penalty. Art 10 para 1 of the above mentioned Act amended art 370A Criminal Code - violation of the privacy of telephonic or oral communication - the sentence of imprisonment is amended into deprivation of liberty from 5 years to 10 years .
 - Act 3691/2008 (art 53 para 1) amended art 187A-terrorists acts- para 6 referring to money laundering and to those providing information or material means in order to collect or manage illegal assets in order to assist in the commission of terrorist activities are punished with a maximum of ten years deprivation of liberty.
 - Act 3663/2008 (art.25) introduced the new art 214A Criminal Code referring to recidivism for crimes of forfeiture of money. Recidivists are those for whom a court of a member- state of the EU has issued a final decision against them.
 - Act 3666/2008 (art. second para 1): i))broadened the crime of passive bribery which is punished by imprisonment- 1year minimum to 5 years maximum.(art. 235 Criminal

Code) , ii) amended art 236 Criminal Code referring to active bribery and a sentence of deprivation of liberty up to 10 years is provided and iii) with the a sentence of up to 10 years a judge who receives money or other means may be punished (art 237 Criminal Code - bribery of a judge - after amendment provides for more severe sentences.

- New legislation concerning certain categories of prisoners Act 3727/2008 in Chapter C, entitled "Measures for the improvement of the conditions of life in prisons" provides, inter alia, for the following measures aiming at the reduction of prison overcrowding : i) as a rule those serving sentences of imprisonment up to 5 years at the time that the present act enters into force may commute their sentence into a financial penalty, unless there is a special justified court decision holding the contrary, ii) the commutation of imprisonment into financial penalty may be facilitated by decreasing the per day payment from 10 euro to 3 euro, iii) less strict conditions are required for parole (e.g. in case of misdemeanors 1/5 or 1/3 depending on the case of the sentence served); this provision applies to those already being imprisoned, iv) parole provisions for persons convicted of violation of drug laws are similar to all other convicted persons i.e. less strict, with the exception of drug violators with attenuating circumstances, v) the possibility of extending provisional detention to 12 and then to 18 months is reserved for detainees prosecuted for felonies with life sentence or sentence up to 20 years, vi) the more lenient conditions for early release on parole provided for prisoners suffering from AIDS are also applied to other categories of severely ill prisoners.

HUNGARY:

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

ICELAND:

According to the European Prison Rules the PPA did take into consideration that prisoners up to 21 years of age (instead of 18 before) can be conditionally released after serving half of their sentence.

IRELAND:

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

ITALIA:

Data do not include juveniles.

LATVIA:

- Data relate to 1st October 2008 instead of 1st September 2008.
- The changes, which influenced the number of prisoners, were made in the Criminal Law of the Republic of Latvia. The changes in the Criminal Law provides that it is forbidden to sentence the offender with a sentence that is suspended if the determined sentence is a deprivation of liberty for a period longer than five years (before the term of the deprivation of liberty was no important).
- It is also added to the Article 55 of the Criminal Law that imposition of a suspended sentence shall not be determined for a person for the committing of an intentional criminal offence, if the person has been previously convicted with deprivation of liberty or custodial arrest and the sentence thereof has not been set aside or extinguished according to the procedures specified by law.
- It is planned that the above mentioned amendments in the Criminal Procedure Law should cause approximately an increase of 200 prisoners in 2008, the increase of 200 prisoners in 2009 and the increase of 300 prisoners in 2010.
- 6 amnesties were applied.

LIECHTENSTEIN:

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

LITHUANIA:

- Data relate to 1st July 2008 instead of 1st September 2008.
- During the period of 1st September 2007 to 31st August 2008, 4 Presidential Decrees proclaimed granting pardon. As a result:
 - 1 prisoner was pardoned from the service of the rest of the sentence;
 - 2 prisoners had the term of their service reduced;
 - 1 prisoner was pardoned from serving the punishment in the form of arrest.

LUXEMBOURG:

Setting up of the Electronic Monitoring project (trial test period).

MALTA:

- Most of Malta's data are provided on the basis of "admissions" counting unit. Therefore, these figures should be interpreted very cautiously.
- 3 individual pardons pronounced.

MOLDOVA:

- Data relate to the Republic of Moldova, without taking into account Transdniestria.
- The laws of the Republic of Moldova nr. 292-XVI from 21.12.2007, nr.14- XVI from 15.02.2008, nr. 277 and 278 from 18.12.2008: a part of minor and less serious criminal offences were decriminalized or/and converted into the administrative offences.
- The application of the Law on Amnesty (from 16.07.2004) and the Law on Amnesty in connection with the proclaimed "Youths' 2008 year" (from 10.07.2008).
- Several individual President Pardons pronounced.

MONACO:

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

NETHERLANDS:

In Tables 1 to 1.5 (except 1.2.a), figures refer to the total number of prisoners: 17,113 (see the breakdown of the general category in the notes to Table 1). In the rest of the Tables, figures refer only to prisoners held in penal institutions for adults (11,799).

NORWAY:

- Rules regarding extra early release were tightened in 2008, thus resulting in some prisoners serving up to 10 more days in prison. However, this did not affect the number of prisoners as the « queue system » and a fixed number of prison places regulate the number of inmates at any given time.
- Extra early release, i.e. release a few days before the normal calculated date, is an initiative to reduce the prison queue.

POLAND:

- Data relate to 31st December 2008 instead of 1st September 2008.
- In this period in the Journal of Laws of the Republic of Poland were published 5 laws changing Criminal Code.

PORTUGAL:

- Data relate to 31st December 2007 instead of 1st September 2007.
- September 15th, 2007 entered into force the new Criminal Code and the Criminal Procedure Code.

ROMANIA:

3 collective pardons were declared. No individual pardon was declared.

RUSSIA:

Data are not available for this year's report.

SAN MARINO:

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

REPUBLIC OF SERBIA:

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

SLOVAKIA:

One amnesty applied.

SLOVENIA:

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

SPAIN (NATIONAL ADMINISTRATION):

- Data do not include juveniles.
- *Ley Orgánica 15/2007 "en materia de seguridad vial"* (Law on Road Safety) of 30th November.
- Collective pardons are forbidden by Spanish Constitution. No relevant data are available on the number of Individual pardons.

SPAIN (CATALONIA):

- Same as for the rest of Spain.

SWEDEN:

- Data relate to 1st October 2008 instead of 1st September 2008.
- No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

SWITZERLAND:

- Data relate to 6th September 2008 instead of 1st September 2008.
- Federal Law "On Aliens" (LEtr) of December 16th, 2005, entered into force on 1st January 2008

THE FORMER YUGOSLAV REPUBLIC OF MACEDONIA:

- 9 Individual pardons and 43 Collective pardons were pronounced.
- 614 conditional releases
- 209 released by a court decision

TURKEY:

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

UKRAINE:

- Data relate to 1st July 2008 instead of 1st September 2008.
- Law of Ukraine N 270-VI from 15th April 2008 “On Introducing Amendments to the Criminal Code and the Criminal Procedure Code of Ukraine as to Humanization of Criminal Liability”
- Within the period from 1st September 2007 to 1st September 2008, 11 decrees of the President of Ukraine “On Pardon” were issued: 930 persons were released.

UK – ENGLAND AND WALES:

- Data relate to 30th June 2008 instead of 1st September 2008.
- The Criminal Justice and Immigration Act 2008 made various changes to the criminal law in respect of the sentencing regime for dangerous offenders.
 - Sections 13-20 modified the provisions so as to change the circumstances in which offenders receive public protection sentences, the effect of which has been significantly to reduce the imposition of such sentences.
 - Sections 25-28 of the Act made changes to the release arrangements for certain prisoners sentenced to more than 4 years in prison, the effect of which will be to release some of them earlier but to make them subject to licence in the community for longer. The relevant provisions may be found at: http://www.opsi.gov.uk/acts/acts2008/ukpga_20080004_en_3#pt2-pb2-l1g13.
- Changes were made in the Criminal Justice and Immigration Act 2008 to apply provisions on the early release of prisoners for deportation to a more extensive group. But these have not been implemented.

UK – NORTHERN IRELAND:

- The Prisons Young offenders Centre (Amendment) Rules (Northern Ireland) 2008 (SR2008 No 452) - 17 December 2008
- The Prisons Young offenders Centre (Amendment) Rules (Northern Ireland) 2009 (SR2009 No 429) - 1 February 2010

UK – SCOTLAND:

No measures (legislative or other) influencing directly the trends in the number of prisoners have been taken in the course of the last 12 months.

CANADA:

- Data relate to 12th April 2009 instead of 1st September 2008.
- Data for Canada are presented in this report for information and were not used for analysis and European comparisons.
- Canada has a 2-tier correctional system, comprised of federal facilities (which house offenders sentenced to 2 years or more) and provincial facilities (which house offenders sentenced to less than 2 years). The data presented in this report pertains to federal offenders and federal facilities only.

Table 1: Situation of penal institutions on 1st September 2008

Reference: Council of Europe, SPACE I 2008.1

Country	Population 2008 - annual estimates (thousands)	Total number of prisoners (including pre-trial detainees)	Prison population rate per 100 000 inhabitants	Total capacity of penal institutions / prisons	Surface area per prisoner (in m ²)	Prison density per 100 places
Albania	3 619.8	5 041	139.3	3 899		129.3
Andorra	82.6	60	72.6	125		48.0
Armenia	2 968.6	3 825	128.8	4 396	4	87.0
Austria	8 205.5	7 899	96.3	8 552	8.51	92.4
Azerbaijan	8 177.7	20 986	256.6	25 150	4	83.4
Belgium	10 404.0	10 234	98.4	8 202		124.8
BH: BH (state level)	2 327.0	19	0.8	20	14.74	95.0
BH: Fed. BH	2 327.0					
BH: Rep. Srpska	1 437.5	924	64.3	1 085	4	85.2

Notes –Table 1

Table 1 must be read taking into account that some countries were unable to provide data on September 1st. In such cases, the relevant reference' day is indicated in the following notes. The reader should also be aware that statistical counting rules vary across Europe and such diversity influence the way in which the total number of prisoners and the capacity of penal institutions are calculated in each country.

Figures from Canadian federal facilities were not used for the calculation of the European central tendency indicators (mean, median).

ALBANIA:

Albania did not answer questionnaire. General figures (total number of prisoners and total capacity of penal institutions) are from the "King's College" Website (World Prison Brief). All data are for the mid June 2008:

http://www.kcl.ac.uk/depsta/law/research/icps/worldbrief/wpb_country.php?country=123

(Retrieved 9th March 2010)

ANDORRA:

- Criminal Code and Criminal Proceedings Code were modified (they entered into force on November 10, 2008).
- New special Penitentiary Law (entered into force on March 22, 2007) and new Law on the Penitentiary Centre Staff (entered into force on March 22, 2007).

AUSTRIA:

Total capacity of penal institutions has been calculated by using the surface area, which is 8.51m²/prisoner.

AZERBAIJAN:

- Data relate to 1st January 2009 instead of 1st September 2008
- The surface area is 4m²/prisoner in penal institutions and 5m²/prisoner in medical treatment institutions.

BOSNIA & HERZEGOVINA (BOSNIA AND HERZEGOVINA – STATE LEVEL):

- BiH State level only includes pre-trial detainees who are held in the State level pre-trial detention unit. There is no State level prison for sentenced persons, they are held in the Federation and Republika Srpska prisons as an interim solution until the State prison is built in 2012. State pre-trial detention unit has the capacity of 21 cells. If the state court (whose purposes this detention unit serves) has more detainees, then they must be referred to entity establishments (BiH: Fed. and BiH: RS). Besides these "state" pre-trial detainees, entity establishments also hold "entity" pre-trial detainees, referred to serve detention by entity courts.
- 14.74m² is the size of a single cell in the State pre-trial detention unit (this is individual space per each detainee in the cell).

BOSNIA & HERZEGOVINA (REPUBLIKA SRPSKA – ENTITY LEVEL):

- Total number of prisoners includes also information on persons sentenced by both, the State level courts and Entity level courts.
- Total capacity of penal institutions has been calculated by using the surface area, which is 4m²/prisoner.

BULGARIA:

The average surface area is about 3m² per prisoner in the closed type of penitentiary institutions, such as prisons' corpus, closed type hostels and investigation places, between 4 and 6m² per prisoner

in open type of penitentiary institutions, in the female prison and the *Reformatory in Bojchinovtsi*. The general average for the totality of the penal institutions is **4 m²**.

CROATIA:

Data relate to 31st December 2008 instead of 1st September 2008

CYPRUS:

- In the total number of prisoners (831) are counted 646 persons held in prisons (including pre-trial detainees) and 185 pre-trial detainees held in police stations. 4 prisoners under the protection witness program held in a separate facility from prison are not included in the total number of prisoners.
- Places in police stations are included in the total capacity of penal institutions. The number of places available in the police stations is 212.
- Capacity of prisons is 340 places.
- Total capacity of penal institutions has been calculated by using the surface area, which is **7m²/prisoner**.

CZECH REPUBLIC:

- Figures are on 31st December 2008 instead of 1st September 2008.
- Total capacity of penal institutions has been calculated by using the surface area, which is **4m²/prisoner**.

ESTONIA:

Figures are on 31st December 2008 instead of 1st September 2008.

FINLAND:

Figures are on 1st May 2008 instead of 1st September 2008.

FRANCE:

- Figures are on 1st October 2008 instead of 1st September 2008.
- On 1st October 2008, **36,185** persons had status “écrouées détenues” (those, who were held *de facto* in penal institutions). This figure should be used when calculating the occupancy rate per number of places in penal institutions. **66,712** persons had status “écrouées”, but were placed under Electronic Surveillance or external placement (outside penal institutions), so non-hosted by Prison Administration. All figures presented in this report are on the persons held inside penal institutions (managed by Prison Administration).
- The capacity of penal institutions is calculated for the detention institutions (hosting persons inside penal institution, without considering external placements).

GEORGIA:

Capacity varies depending on the type of detention. This can be from **2** to **3.5m²/prisoner**. The average presented in this table is **2.75m²**.

GERMANY:

Figures are on 31st March 2008 instead of 1st September 2008.

ICELAND:

The surface area varies between **6** and **13m²/prisoner**.

LATVIA:

- Figures are on 1st October 2008 instead of 1st September 2008.
- The norm for living space in prisons for one convicted person in hostel-type premises shall not be smaller than **2.5m²** for men and **3m²** for women and juveniles.

LITHUANIA:

Figures are on 1st July 2008 instead of 1st September 2008.

MALTA:

- Most of Malta's data are provided on the basis of "admissions" counting unit. Therefore, these figures should be interpreted very cautiously.
- Total capacity figure is an approximation, which takes into account the actual number of single cells as well as the *ad hoc* dormitories used due to the overcrowding problem. In Malta, a single cell policy is applied (one inmate per cell). New beds were added in order to accommodate the additional number of incoming inmates in the facility.

MONACO:

Total capacity of penal institutions has been calculated by using the surface area, which is 5.6m²/prisoner. Special places exist for juveniles in the "Juveniles' section". No other special places are provided (e.g. mentally-ill persons are transferred to the "Princess Grace" Hospital in Monaco).

NETHERLANDS:

- Total number of prisoners is 17,113, of which:
 - 11,799 are in penal institutions,
 - 1,762 are in juvenile institutions
 - 1,660 are in institutions for aliens and
 - 1,892 are in custodial clinics.
- In this Table has been used the total number of prisoners held in all types of penal institutions. In further tables has been used the number of prisoners held in penal institutions (11,799).
- **The total capacity is 21,418, of which 14,522 places in penal institutions, 2,207 –in institutions for juveniles, 1,952 –in custodial clinics, and 2,737 –in institutions for aliens.**

POLAND:

- Data relate to 31st December 2008 instead of 1st September 2008.
- Total capacity of penal institutions has been calculated by using the surface area, which is 3m²/prisoner.

PORTUGAL:

Data relate to 31st December 2008 instead of 1st September 2008.

ROMANIA:

The number of places in cells in the penal institutions is calculated by using the volume – the volume foreseen per prisoner is 6m³ (cubic meters).

RUSSIA:

Russia did not answer questionnaire. General figure of the Total number of prisoners was retrieved from the Website of the Federal Service of the Execution of Sentences of Russian Federation (FSIN): <http://www.fsin.su/main.phtml?cid=6>

SAN-MARINO:

Total capacity of penal institutions has been calculated by using the surface area, which is 3m²/prisoner.

SLOVAK REPUBLIC:

Total capacity of penal institutions has been calculated by using the surface area, which is 4m²/prisoner.

SLOVENIA:

Prescribed standards are: 9m² for single rooms and 7m² per prisoner for double and multiple-bed rooms.

SPAIN (STATE ADMINISTRATION):

- Total capacity of penal institutions has been calculated by using the surface area, which is 5.02m²/prisoner. The capacity refers to cells, including:
 - 34,365 residential cells,
 - 5,883 auxiliary cells, and
 - 3,399 cells in Open Facilities
- Average calculations of the surface area are difficult as:
 - For old prisons, cells are of different size and some of them for 2 to 3 inmates.
 - For prisons created after 1991 (Type Prisons), cells are of 9m². They were designed for 1 inmate, and in exceptional cases (as it is happening now in many cases) they are occupied by 2 inmates.
 - For Open Facilities, cells are always for 2 inmates, as they only stay to sleep.

SWEDEN:

Data relate to 1st October 2008 instead of 1st September 2008.

SWITZERLAND:

Data relate to 6th September 2008 instead of 1st September 2008.

“THE FORMER YUGOSLAV REPUBLIC OF MACEDONIA”:

Total capacity of penal institutions has been calculated by using the surface area, which is 4m²/prisoner.

UKRAINE:

- F. Data relate to 1st July 2008 instead of 1st September 2008.
- G. The standard residential area in penal settlements is 3m²/prisoner, in penal colonies and penal settlements intended to detain women is 4m²/prisoner, in medical institutions at penal settlements, in penal settlements intended to detain and treat patients suffering from tuberculosis, at inpatient department is 5m²/prisoner (article 115 of the Criminal Executive Code of Ukraine).

UK: ENGLAND AND WALES:

- Data relate to 30th June 2008 instead of 1st September 2008.
- The total prison population includes remand and non-criminal prisoners (total population of prison establishments in England and Wales). In the total are not included secure training centres and local authority secure children's homes.
- Total capacity of penal institutions used for this Table is the operational capacity of all prisons not counting spaces available in police cells (400). This is the total number of prisoners that an establishment can hold taking into account control, security and the proper operation of the planned regime. It is determined by area managers on the basis of operational judgement and experience.

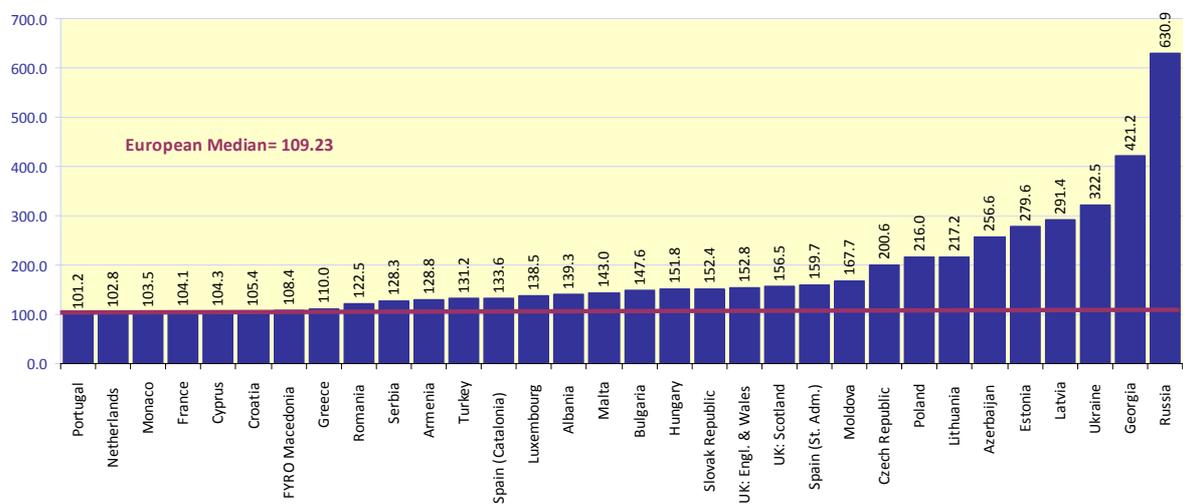

UK: SCOTLAND:

This figure is the *design* capacity of the penal institutions on 1st September 2008.

CANADA:

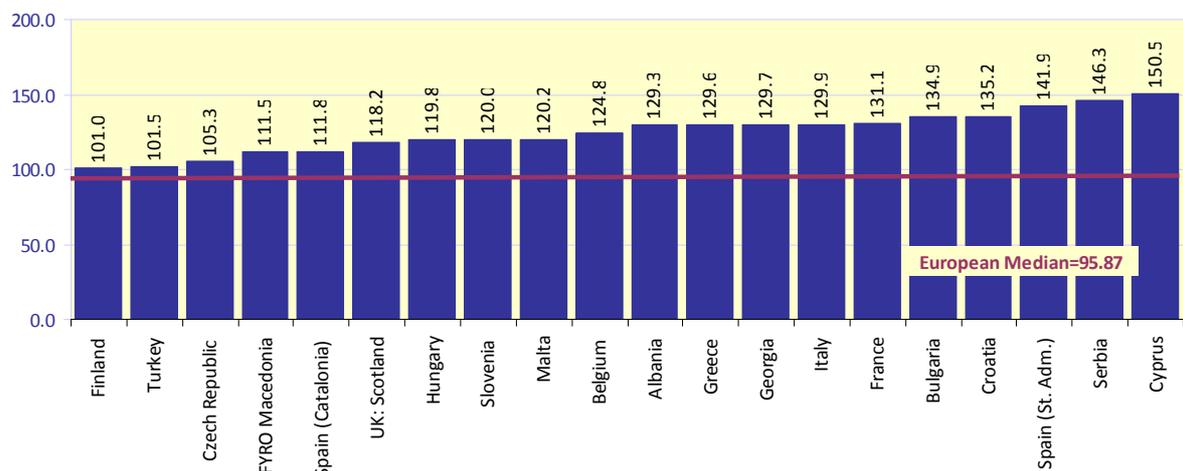

Canada has a 2-tier correctional system, comprised of federal facilities (which house offenders sentenced to 2 years or more) and provincial facilities (which house offenders sentenced to less than 2 years). The data presented in this report pertains to federal offenders and federal facilities only.

Figure 1.a: Countries with the highest Prison Population Rates per 100 000 inhabitants (more than 100 prisoners per 100 000 inhabitants)

We noticed that the European median (109.2) for the prison population rate is almost the same as in 2007 (109.5). Almost all countries which experienced highest prisons population rates remained at the same level or continued to increase. The only exceptions were Austria and Portugal, which experienced a decrease.

Figure 1.b: Countries with prison population overcrowding (more than 100 prisoners per 100 places)

Comparisons of prison overcrowding should be conducted cautiously as the rules for establishing the capacity of penal institutions vary from country to country (e.g. some countries use the *design* capacity of their penal institutions and other used their *operational* capacity).

A comparison of the 2008 and the 2007 rates shows a very slight decrease in prison density (it passed from 96.7 in 2007 to 95.87 in 2008). Nevertheless, in 2008 there is a higher number of countries that have more than 130 prisoners per 100 places (in 2007: 3 countries; in 2008: 6 countries).

Table 1.2: Categories included in the total number of prisoners

Does the total number of prisoners include the following categories?

- (1) Persons held in facilities that do not depend on the Prison Administration (police stations, non-Ministry of Justice facilities or similar facilities)
- (2) Persons held in institutions for juvenile offenders
- (3) Persons held in institutions for drug-addicted offenders
- (4) Prisoners with psychological and/or psychotic disorders who were considered as non-criminally liable by the court, held in psychiatric institutions or hospitals
- (5) Prisoners with psychological and/or psychotic disorders **held in psychiatric institutions or hospitals** in order to execute the main or the supplementary sanction (i.e. sexual offenders)
- (6) Prisoners with psychological and/or psychotic disorders **held in especially designed sections inside penal institutions** in order to execute the main or the supplementary sanction (including sexual offenders)
- (7) Asylum seekers or illegal aliens held for administrative reasons
- (8) Persons serving their sentence under electronic surveillance/ Electronic Monitoring

Notes – Table 1.2

AZERBAIJAN:

- Data relate to 1st January 2009 instead of 1st September 2008
- **Point (1)** –These persons are not included in the total number of prisoners. Nevertheless, the number is known: 2,393 people under administrative arrests held in facilities which do not depend on the Prison Administration.
- **Point (2)** –39 detainees held in educational institution (juvenile correction penitentiary) are not included in the total number of prisoners, as this institution is under the authority of the Ministry of Education. Among 39 detainees, 6 are aged 18 years and over.

BOSNIA & HERZEGOVINA (REPUBLIKA SRPSKA – ENTITY LEVEL):

- **“Places provided for persons under points (1) to (8)”** –There are additional 20 places in the department for execution of educational measure of referral to the correctional-educational home within *Banja Luka Prison*, and 20 places in the department for execution of juvenile imprisonment of *Istocno Sarajevo Prison*.

CROATIA:

Data relate to 31st December 2008 instead of 1st September 2008

CYPRUS:

- **Point (1)** –185 persons are held in police stations and 4 prisoners under the protection witness program and held in a separate facility from prison. The latest 4 prisoners were not included in the total number of prisoners.

CZECH REPUBLIC:

- Figures are on 31st December 2008 instead of 1st September 2008.
- **“If (2) counted, how many over 18 years?”** –Prisoners included in this category are over 18 years undergoing training (courses, education etc.).
- **Point (6)** –Prisoners who were accepted to stay in the prison psychiatric clinic for some time

DENMARK:

- **Point (2)** –Juveniles are defined as 15-17 years of age. Juveniles taken into custody must primarily be placed outside the local prisons in, for example, secured social institutions. Sometimes, juveniles are placed in local prisons -for example if the social institutions cannot manage the juveniles because of violent behavior, or placed temporarily in local prisons until there is room in the secured social institutions. There is no limits to the number of juveniles placed in local prisons. The Danish Criminal Law has special rules for handling juveniles in the institutions under the Prison and Probation Service. A minority of juveniles have to serve their sentence in prison. They will then be placed in open prisons, unless certain circumstances of the juvenile speaks against it. From the beginning of 2009 juveniles referred to open prison will be placed in a special juvenile unit that opens in the *prison of Jyderup*. If referred to closed prison juveniles will as a rule be placed in a special juvenile unit in the *State prison of Ringe*.

ESTONIA:

Figures are on 31st December 2008 instead of 1st September 2008.

FRANCE:

- Figures are on 1st October 2008 instead of 1st September 2008.
- **Point (2)** –In this table are presented only persons held in special penitentiary institutions for juveniles (EPM). In addition there are also persons less than 18 years old held in prisons and in prison sectors for juveniles.

GERMANY:

Figures are on 31st March 2008 instead of 1st September 2008.

GREECE:

- **Point (7)** –Persons seeking asylum or illegal immigrants are, as a rule, held in areas outside the prison system .These persons are under the auspices of the Ministry for the Protection of the Citizens (Ministry of Public Order before October 2009). However, in prisons are held foreigners that in addition to a criminal sanction have been sanctioned with the sentence of expulsion from the country. Until the expulsion - which is not an administrative sanction but a criminal one in this case - is executed these persons are kept in the prison facilities. Only in the case of minors above 13 years of age and mentally ill offenders held responsible are kept in the prison system.

HUNGARY:

- **Point (4)** –Total number is 184, of which: 27 women and 149 men.
- **Point (6)** –there is no information on illegal aliens, because, from 2007, aliens are held outside prison service institutions, at alien registration authorities.

ICELAND:

- **“Places provided for persons under points (1) to (8)”** –Places for non-criminally liable persons are not included (they are not under Prisons and Probations responsibility).

ITALY:

- **Point (3)** – Specific data on the number of drug-addicted prisoners held in specially designed institutions is missing. Nevertheless, the total number of drug-addicted prisoners (all Italian correctional facilities) as of 30th June 2008 was **14,743**.
- **Points (4), (5), and (6)** – The Office of Statistics of this Department does not make any distinction between those who are considered as “immune from prosecution” upon their verdict and those who are serving a main sanction or a complementary sanction in a Judicial Psychiatric Hospitals or in special psychiatric wings. Both these categories of subjects are called *internees*. Therefore, the total coincides with the number of internees (**1,591**).

LATVIA:

Figures are on 1st October 2008 instead of 1st September 2008.

LITHUANIA:

- Figures are on 1st July 2008 instead of 1st September 2008.
- **“Places provided for persons under points (1) to (8)”** –These places are not included in the total capacity of penal institutions, but the number of places available for these particular categories of prisoners is known (9, 062).

LUXEMBOURG:

- **Point (7)** –The Grand Duchy’ Regulation from 20th September 2002 states that the "Centre for provisional detention of the illegal aliens" is established inside a special section of the Luxembourg’ Penitentiary Centre - pending the construction of a separate especially designed centre, which will be put into service at the end of 2010.

NETHERLANDS:

- **Point (2)** –This category of detainees (1,762) is included only in the general total of **17,113** prisoners, which has not been used for subsequent calculations.
- **Point (3)** –In the Netherlands exist also special facilities (*Instelling voor Stelselmatige Daders (ISD): Institution for Systematic Perpetrators*) in which are held multiple offenders under a

security measure (generally imposed for two years). Many of these detainees are addicted too, but an accurate figure cannot be provided on this category of persons.

- **Point (4)** –This category of detainees (1,892) is included only in the general total of **17,113** prisoners, which has not been used for subsequent calculations. [Last year figure should be 1,789 instead of 1,672 \(amendment provided by national correspondent\)](#).
- **Point (7)** –This category of detainees (1,660) is included only in the general total of **17,113** prisoners, which has not been used for subsequent calculations.

The total of 17,113 detainees has been provided only for Table 1. In other tables of the present report, a total of 11,799 detainees has been used by eliminating persons held in institutions for juveniles, custodial clinics, and institutions for aliens (categories (2), (4), and (7)). In several cases persons from institutions for aliens were added to the population of penal institutions. When it was done, an explanation was provided in “Notes” below each specific Table of the report.

NORWAY:

- Some sentenced persons may serve all or part of a prison sentence in an accredited treatment centre. These persons are not included in any figures given in this report. There is no fixed number of allocated places in the various institutions (these may be private/charitable or official).

POLAND:

Figures are on 31st December 2008 instead of 1st September 2008.

PORTUGAL:

- Figures are on 31st December 2008 instead of 1st September 2008.
- **Point (2)** –*Leiria’s Penitentiary Institution* (detainees from 16 to 21 years), including pre-trials.
- **Point (4)** –256 prisoners, including 86 prisoners held in *penitentiary* psychiatric institutions or hospitals, and 170 prisoners held in *non-penitentiary* psychiatric institutions or hospitals. 256 is the total number of persons considered non-criminally liable by the court, who are not *stricto sensu* sentenced prisoners, but persons under a security measure (which is rather therapeutic). These persons are under the authority of the Prison Administration and their files are managed by the Court of Execution of Sentences. Nevertheless, all decisions concerning this category of persons are taken on the advice of medical authorities.
- **Point (8)** –Detainees under the Electronic Surveillance are in charge of the General Service of the Community Reintegration (*Direcção General de Reinserção Social*).

ROMANIA:

- **Point (6)** –2,736 persons held in prisons and prison hospitals.

SPAIN (STATE ADMINISTRATION):

- **Point (3)** –Figure is on 31st December 2008 instead of 1st September 2008.
- **Point (4)** –Are counted only prisoners sentenced, who are non-criminally liable and under the safety measure held in two special psychiatric penitentiaries. Prisoners under security measures placed in non-penitentiary centres are excluded.

SPAIN (CATALONIA):

- **Point (4)** – This category is not included in the prison statistics, but the concept exists in the Criminal law. These data could be available for the Probation services.
- **Point (5)** –*Cárcel de Brians*
- **Point (6)** –Psychiatric infirmaries
- **“Places provided for persons under points (1) to (8)”** –places included in the total capacity of penal institutions are for persons from **point (3), (5), and (6)**.

SWEDEN:

- Figures are on 1st October 2008 instead of 1st September 2008.
- **Point (8)** –Prisoners under pre-release measures still serving a sentence (“back-door electronic monitoring”).

SWITZERLAND:

- Figures are on 6th September 2008 instead of 1st September 2008.
- **Point (5)** –There is a number of persons sentenced or interned (non-criminally liable), who are placed in special psychiatric institutions which are not under the Prison authorities, but are managed by special medical authorities.
- **Point (6)** –“The deprivation of liberty for the assistance purposes”: persons under these measures are placed by medical (psychiatric) authorities, but their detention is managed by the Prison authorities of the cantons.
- **Point (7)** –Persons under coercive measures (waiting for expulsion) are actually placed by the authorities in charge of foreigners and not by Prison authorities. Nevertheless, the detention of these persons is managed by the Prison authorities of the cantons.
 - The total capacity of institutions and special sections inside prisons for this type of detention is **449** places.
 - The capacity of institutions designed for the administrative detention is **228** places.

“THE FORMER YUGOSLAV REPUBLIC OF MACEDONIA”:

- **Point (6)** –Data on sexual offenders only
- **“Places provided for persons under points (1) to (8)”** –places only for persons held in institutions for juveniles are included in the total capacity of penal institutions

UKRAINE:

Figures are on 1st July 2008 instead of 1st September 2008.

UK: ENGLAND AND WALES:

- Figures are on 30th June 2008 instead of 1st September 2008.
- **Point (2)** –The figure of 473 relates to *Secure Children’s Homes (SCH)* and *Secure Training Centres (STC)* only. There were a further 2,527 under 18 year olds held in prison as at 30th June 2008. Hence the total number of people in custody as at 30th June 2008 was 83,667 (i.e. 83,194 in prison plus 473 in SCH/STCs). These 473 are not included in the total number of prisoners in Table 1 (**83,194**).
- **Point (8)** –At the end of 2008, **2,600** prisoners were serving part of their sentence on Home Detention Curfew (Electronic Monitoring) *Source: OMCS 2008 t 9.3*. Other offenders get community order or suspended sentence orders with a curfew requirement. Those who are serving their sentence under Electronic Monitoring are not part of the prison population. They are not included in the total number of prisoners in Table 1 (**83,194**).

UK: SCOTLAND:

- **Point (2)** –Prisoners in young offender institutions are usually at least 16 years old although a small number of 14 and 15 year olds may be held for short periods. Whilst the age of criminal responsibility is 8 years old, children aged 8-15 are generally dealt with outwit the adult court system. Among the total number of 710 prisoners of the Young Offenders’ Institute, 163 prisoners were aged 18.
- **“Places provided for persons under points (1) to (8)”** -623 places is the capacity of the Young Offenders’ Institute.

Figure 1.c: Countries which include/exclude special places from the Total capacity of penal institutions on 1st September 2008

Countries which INCLUDE places designed for populations in the Table 1.2 in the Total capacity of penal institutions	Countries which EXCLUDE places designed for populations in the Table 1.2 from the Total capacity of penal institutions
Armenia Austria Azerbaijan Bulgaria Croatia Cyprus Czech Republic Estonia France Georgia Germany Greece Hungary Ireland Italy Liechtenstein Luxembourg Malta Netherlands Poland Romania Serbia Slovak Republic Slovenia Spain (Catalonia) Switzerland The FYRO Macedonia UK: Scotland	Belgium BiH: Republika Srpska Finland Iceland Latvia Lithuania Moldova Norway Portugal Spain (State Adm.) Turkey Ukraine UK: England and Wales UK: Northern Ireland

Notes – Figure 1.c

BIH (REPUBLIKA SRPSKA): Places are not included in the total capacity of penal institutions, as there are additional 20 places in the department for execution of educational measure of referral to the correctional-educational home within *Banja Luka Prison*, and 20 places in the department for execution of juvenile imprisonment of *Istocno Sarajevo Prison*.

ICELAND:

Additional 19 places for non-criminally liable persons are not included in the total capacity as they are not under Prisons and Probations responsibility.

CYPRUS:

Places in police stations are included in the total capacity of penal institutions. The number of places available in the police stations is 212.

LITHUANIA:

Additional 9, 062 places in different types of particular detention institutions are not included in the total capacity of penal institutions.

MONACO:

Special places exist for juveniles in the “Juveniles’ section” but these cannot be separated in the total capacity of the detention centre of Monaco. No other special places are provided (e.g. mentally-ill persons are transferred to the “Princess Grace” Hospital in Monaco).

NORWAY:

Some sentenced persons may serve all or part of a prison sentence in an accredited treatment centre. These persons are not included in any figures given in this report, therefore no additional number of allocated places in the various institutions is provided.

PORTUGAL: Places for 170 persons held in non-penitentiary psychiatric institutions are not included in the total capacity.

SPAIN (STATE ADMINISTRATION): Places not included in the total capacity are thus in psychiatric institutions (417 places).

SPAIN (CATALONIA):

The only included places are those for persons from centres for drug-addicted offenders (116 places) and thus in psychiatric institutions or sections (108 places).

SWITZERLAND:

The total capacity of institutions and special sections inside prisons for the detention of illegal aliens is 449 places. Moreover, there are additional 228 places in institutions especially designed for the administrative detention. So, a total number of 677 places for administrative detention is included in the total capacity of penal institutions.

THE FYRO MACEDONIA: The only figures available are those for persons held in institutions for juvenile offenders.

TURKEY: The number of places in institutions for juveniles is excluded from the total capacity of penal institutions, as these places are not managed by the General Directorate. This note is different from the previous year report, and should be considered particularly when interpreting Turkish data.

UK: SCOTLAND: The number of places for juvenile offenders held in special institutions is 623 places, and these places are included in the total capacity of penal institutions.

Notes – Table 1.2.a and 1.3

In Table 1.2.a figures have been adjusted according to the information provided by the countries on the categories included and excluded in the total prison population (see Table 1.2). Nevertheless, these data **must be considered with caution** as the adjustments do not necessarily take into account all national particularities due to the *statistical counting rules* applied by each country.

The total adjusted number of prisoners corresponds, in the majority of cases, to the number of prisoners held in facilities which are under the authority of the Prison Administration. In many countries, special institutions which manage the detention of juveniles, drug-addicts, mentally ill persons, and administrative aliens are not necessarily under the authority of the Prison Administration. Such countries dispose of separate official bodies dealing with these particular penal populations. Thus, in Table 1.2.a all these categories were excluded from the total number of prisoners.

The aim of the Table 1.2.a is to present the number of adult criminally liable offenders, tried or sentenced for *criminal* offences, held in institutions under the Prison Administration authority.

Important methodological remark:

In Table 1.2.a it was not always possible to exclude all the categories presented in Table 1.2, as some figures were missing. A great part of missing figures were in the category of “Offenders with psychological and/or psychotic disorders held in especially designed sections inside penal institutions in order to execute the main or the supplementary sanction”. These figures were missing for **Belgium, Finland, France, Luxembourg, Slovak Republic, Slovenia, and Switzerland**. Figures on persons held in institutions for drug-addicted offenders were missing for **Finland, Italy, and Slovak Republic**. Moreover, for many countries there was no explicit statement on the categories of penal populations which are under the control of penitentiary authorities.

One can stress that the average difference between the non-adjusted and the adjusted numbers is less than 10% (Table 1.3). Only two countries overpass a 20% difference between them. In the case of **Cyprus**, the difference is explained by the important number of persons held in police stations. The **Netherlands** show a difference of more than 35% because it includes many specific categories of detainees. Our adjusted figure does not correspond to the figure provided by the national correspondent as an estimated of their prison population because, looking for an accurate comparison, we have excluded all the special categories mentioned in Table 1.2.

Nevertheless, the Dutch Prison Administration has their own counting rules and, according to them, there is a total of 17,113 persons deprived of liberty (102.8 per 100,000 inhabitants, as indicated in Table 1) of which 11,799 are held in penal institutions (which will lead to a rate of 70.9). They arrive to that total by eliminating the categories of “juveniles” (1,762), “persons held in custodial clinics” (1,892), and administrative aliens (1,660); but they keep the rest of the categories, including “drug-addicted offenders” (500), “offenders with psychological and/or psychotic disorders held in especially designed sections inside penal institutions in order to execute the main or the supplementary sanction” (383), and those who are under Electronic Surveillance (371). This explains the difference between our calculations and the national Dutch records.

Table 1.4: Evolution of prison populations between 2000 and 2008

- (a) Total number of prisoners (including pre-trial detainees) on 1st September of each year (source SPACE I)*;
 (b) Prison population rate per 100,000 inhabitants on 1st September of each year (source: SPACE I)*;
 (c) Change 2000-2008 = Evolution (in percentage) of prison population rates between **2000** and **2008**;
 (d) Change 2007-2008 = Evolution (in percentage) of prison population rates between **2007** and **2008**.

***N.B.** – For some countries, the reference date may vary across years (see SPACE I 2000 to 2007 for details)

Notes – Tables 1.4 and 1.5

Tables 1.4 and 1.5 are based on non-adjusted figures in order to ensure comparability with data from previous years.

CYPRUS: For the calculations in the Tables 1.4 and 1.5 we have used data *excluding* detainees held in police stations. This information has not always been provided for the previous years. Therefore, in order to ensure the comparability with the data from previous years, we kept this year only the category of prisoners in penal institutions (646) without detainees held in police stations (185).

ITALY: Data for 2004 are not comparable with data for 2003, because in 2003 the prison population included juveniles, and in 2004 they are not more counted. In 2008, figures do not include juveniles; therefore these data are comparable with figures from 2004, 2005, 2006, and 2007.

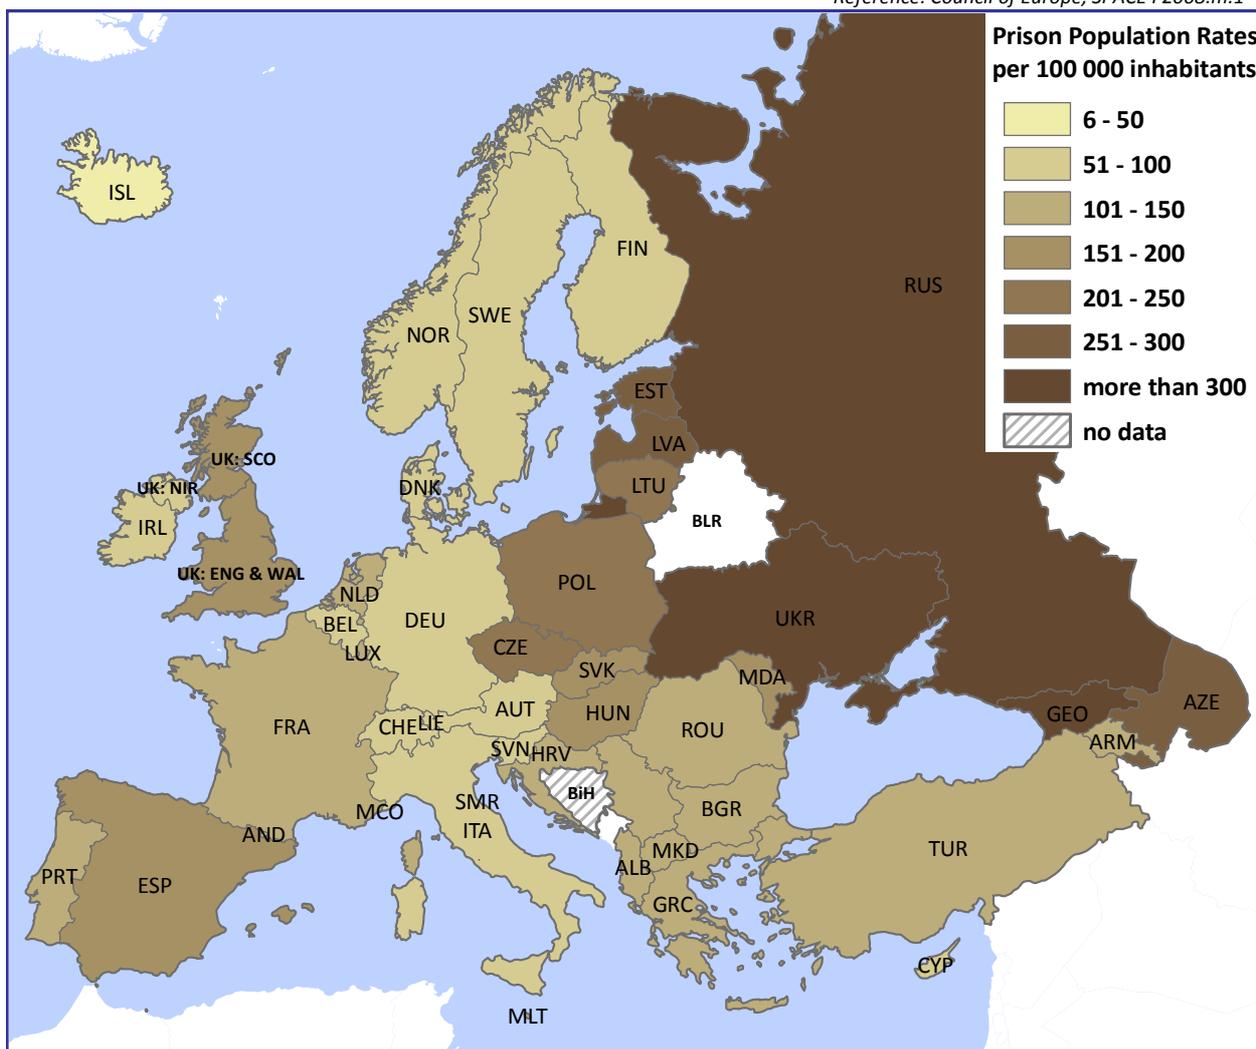

SPAIN (INCLUDING CATALONIA): In order to ensure the accuracy of the comparisons with the previous years' data, we added Catalonian data in the total number of prisoners (Spain- State Administration and Catalonia), and we recalculated the prison population rate for the whole country.

Among nine countries which had a decrease of more than 5%, five already showed the same trend last year (**Moldova, Romania, Netherlands, Portugal, and Luxembourg**). Among the thirteen countries with an increase of more than 5%, five are the same as last year (**Serbia, Ireland, Italy, Georgia, and Turkey**).

For more detailed information on the 2008 data, see explanatory notes for previous tables of this report.

Map 1: Prison population rates per 100,000 inhabitants

*** ISO 3166-1 alpha-3 codes:**

The three-letter country codes are the ones published by ISO (*International Organisation of Standardization*). These country codes were used to identify Member States of the Council of Europe on the map presented above (excluding Bosnia and Herzegovina). For constituent countries of the United Kingdom we have used the three-letter codes from FIFA (*International Federation of Association Football*): ENG, WAL, NIR, and SCO.

Important note: Many categories from this table are not comparable with the ones included in last year's report (SPACE I 2007) because the categorisation by age groups changed. For comparisons, see special notes for Table 2 in last year's report.

Notes – Table 2

ARMENIA:

- The distribution by age categories in this table is an estimation made by national authorities. Therefore, the total number of prisoners is not equal to the sum of the distribution by age from this table.
- **Points (c) and (d)** –From 18 to less than 25 years
- **Point (f)** –From 25 to less than 35 years
- **Point (g)** –From 35 to less than 45 years
- **Points (h) and (i)** –From 45 to less than 60 years
- **Points (j) and (k)** –60 years and over

AUSTRIA:

- **Point (l)** –From 81 to 94 years
- **Point (m)** –9 children live in prison with their mothers (their age is not included in general distribution).

AZERBAIJAN:

- Figures are on 1st January 2008 instead of 1st September 2008. In this Table are included only sentenced prisoners.
- **Points (a), (b), and (c)** –Juvéniles are not included, as they are not managed by Prison Administration.
- **Points (d), (e), (f), (g), and (h)** –From 18 to less than 50 years
- **Points (j), (k), and (l)** –60 years and over
- For accuracy reasons we included 2,254 pre-trial detainees for which the age distribution is not available in the **point (m)** of this Table.

BELGIUM:

- **Point (l)** –From 81 to 94 years
- **Point (m)** –For 9 persons the age recorded in the file or declared by the person was contested by a judiciary authority (e.g. the authorities consider that a person is adult while the she stated to be juvenile).

CYPRUS:

In this item are considered persons held in prisons; the breakdown by age for detainees held in police stations is not available.

CZECH REPUBLIC:

- Figures are on 31st December 2008 instead of 1st September 2008
- **Point (b)** – As the age of criminal responsibility is 15, juveniles included in this category are 15 years old

ESTONIA:

Figures are on 31st December 2008 instead of 1st September 2008

FINLAND:

Figures are on 1st May 2008 instead of 1st September 2008

FRANCE:

- Figures are on 1st October 2008 instead of 1st September 2008
- **Point (b)** –From 13 to less than 16 years
- **Points (j), (k), and (l)** –60 years and over

GEORGIA:

Data are not available as the new statistical system is not yet implemented. The only known figure is on persons aged 14 to less than 18 years (**points (b) and (c)**).

GERMANY:

- Figures are on 31st March 2008 instead of 1st September 2008
- In this Table are included sentenced prisoners and prisoners under preventive measures.
- **Point (k)** –The oldest prisoner in this age group is 72.
- **Point (m)** – For accuracy reasons we included 12,358 pre-trial detainees in the **point (m)** of this Table. The distribution available for this group of detainees is as follow:
 - From 14 to less than 18 years – 558
 - From 18 to less than 21 years – 1,291
 - From 21 years and over – 10,509

GREECE:

- **Points (a), (b), and (c)** -The data available refer to minors; these cover boys and girls mainly 13 to 18 years of age. The relevant figure on 1st September 2008 was 491. However, in this figure might be included some boys below 13 or above 18 up to 25.

HUNGARY:

- On the basis of the change in the Criminal Code the age of the criminal responsibility is 14 years.
- **Points (a) and (b)** –detainees less than 16 years old
- **Point (c)** –From 16 to less than 19 years
- **Points (d) and (e)** –From 19 to less than 25
- **Points (j), (k), and (l)** –60 years and over

IRELAND:

- The age of criminal responsibility is 12 years. There is an exception for children aged 10 or 11 who can be charged with murder, manslaughter, rape or aggravated sexual assault.
- **Point (l)** – The oldest prisoner in this age group is 87.

ITALY:

- Data on persons less than 18 years of age are not available in these statistics. These categories are held in specially designed institutions for juvenile offenders, which are not managed by the Italian Penitentiary Administration.
- **Points (k) and (l)** –from 70 years and over
- **Point (m)** –68 persons for who the age has not been recorded.

LATVIA:

- Figures are on 1st October 2008 instead of 1st September 2008. In this Table are included only sentenced prisoners.
- **Points (b) and (c)** –up to 18 years old
- **Points (j), (k), and (l)** –60 years and over
- For accuracy reasons we included 1,679 pre-trial detainees for which the age distribution is not available in the **point (m)** of this Table.

LITHUANIA:

- Figures are on 1st July 2008 instead of 1st September 2008
- In this Table are included only sentenced prisoners. Pre-trial detainees and prisoners under preventive measures are not counted; insofar no special data are available.
- **Points (e) and (f)** –from 21 to less than 30 years
- **Points (j), (k), and (l)** –60 years and over

MOLDOVA:

- In this Table are included only sentenced prisoners. Pre-trial detainees and prisoners under preventive measures are not counted; insofar no special data are available.
- **Points (e) and (f)** –From 21 to less than 30 years
- **Points (j), (k), and (l)** –60 years and over
- For accuracy reasons we included 1,105 pre-trial detainees for which the age distribution is not available in the **point (m)** of this Table.

NETHERLANDS:

- The age of criminal responsibility is 12 years. People younger than 18 years can be detained from the age of 12 in special institutions for juveniles. The age in which people can be detained under criminal adult law is 18 years (with a few exceptions in which youngsters can be trialled according to adult law).
- The distribution in this Table concerns only the population in the penal institutions and institutions for aliens, without taking into account juvenile offenders, and people in custodial clinics.
- **Point (m)** –For 14 persons the record of age is missing

POLAND:

- Figures are on 31st December 2008 instead of 1st September 2008.
- **Point (m)** –367 persons under a special measure (“punished”). For these persons the age distribution is unknown.

PORTUGAL:

- Figures are on 31st December 2008 instead of 1st September 2008
- **Points (j), (k), and (l)** –60 years and over

ROMANIA:

- **Points (e) and (f)** –From 21 to less than 31 years
- **Point (g)** –From 31 to less than 41 years
- **Point (h) and (i)** –From 41 to less than 60 years
- **Points (j), (k), and (l)** –60 years and over

SLOVAK REPUBLIC:

- Figures (in this table) are on 31st December 2008 instead of 1st September 2008.
- In this Table are included only sentenced prisoners. Pre-trial detainees and prisoners under preventive measures are not counted; insofar no special data are available.
- **Points (b) and (c)** –From 14 to less than 18 years
- **Points (d) and (e)** –From 18 to less than 25 years
- **Point (g)** –From 30 to less than 45 years
- **Points (h) and (i):**
 - Women: from 45 to less than 60
 - Men: from 45 to less than 65
- **Points (j), (k), and (l):**
 - Women: 60 years and over
 - Men: 65 years and over

SLOVENIA:

- **Point (e)** –From 21 to less than 23 years
- **Point (f)** –From 23 to less than 27 years
- **Point (g)** –From 27 to less than 39 years
- **Point (h)** –From 39 to less than 49 years

- **Point (i)** –From 49 to less than 59 years
- **Point (j)** –From 59 to less than 69 years
- **Points (k) and (l)** –69 years and over

SPAIN (STATE ADMINISTRATION):

- The age of “sanctioning responsibility” is 14. The age of “criminal responsibility” is 18. From 14 to 17 years old, only reduced sentences are applied. Only at 18 years old can a prison sentence be imposed.
- **Point (e)** –From 21 to less than 26 years
- **Point (f)** –From 26 to less than 31 years
- **Point (g)** –From 31 to less than 41 years
- **Points (h) and (i)** –from 41 to less than 60 years old
- **Points (j), (k), and (l)** –60 years and over
- **Point (m)** –For 901 persons the age is unknown.

SWEDEN:

- Figures are on 1st October 2008 instead of 1st September 2008
- In this Table are included only sentenced prisoners. Pre-trial detainees and prisoners under preventive measures are not counted; insofar no special data are available.
- **Points (b) and (c)** –From 15 to less than 18 years
- **Point (d)** –From 18 to less than 21 years
- **Point (e)** –From 21 to less than 25 years
- **Point (f)** –From 25 to less than 30 years
- **Point (g)** –From 30 to less than 35 years
- **Point (h)** –From 35 to less than 45 years
- **Point (i)** –From 45 to less than 55 years
- **Point (j)** –From 55 to less than 65 years
- **Points (k) and (l)** –65 years and over
- For accuracy reasons we included 1,454 pre-trial detainees for which the age distribution is not available in the **point (m)** of this Table.

SWITZERLAND:

- Figures are on 6th September instead of 1st September 2008
- **Points (a), (b), and (c)** –Are included detainees less than 18 years.
- For no any other category data are not available.

TURKEY:

- **Point (k)** –The oldest prisoner in this age group is 95.

UKRAINE:

- Figures are on 1st July 2008 instead of 1st September 2008
- In this Table are included only sentenced prisoners. Pre-trial detainees and prisoners under preventive measures are not counted; insofar no special data are available.
- **Points (b) and (c)** –From 14 to less than 18 years
- **Points (e) and (f)** –From 21 to less than 30 years
- **Point (h)** –From 40 to 55 years
- **Point (i)** –From 56 to less than 60 years
- **Points (j), (k), and (l)** –60 years and over
- For accuracy reasons we included 1,454 pre-trial detainees for which the age distribution is not available in the **point (m)** of this Table.

UK: ENGLAND AND WALES:

- Figures are on 30th June 2008 instead of 1st September 2008
- **Point (l)** –From 81 to 110 years

Notes – Table 2.1

For more detailed information on the 2008 data, see the explanatory notes of previous tables.

Data provided in Table 2.1 should be considered cautiously as the percentages could not always be calculated on the basis of the total number of prisoners. Whenever countries were not able to provide the age breakdown for all prisoners, percentages are based on data on sentenced prisoners only (see notes to Table 2).

CYPRUS:

Percentages for this Table were calculated on the basis of the population in penal institutions, excluding persons held in police stations.

GERMANY:

- The total number of prisoners under 18 years is **1,221**, of which 558 are pre-trial detainees, and 663 are sentenced prisoners. Consequentially, the percentage in this table was calculated on the basis of the whole population in penal institutions.
- The total number of prisoners between 18 and less than 21 years is **4,669**, of which 1,291 are pre-trial detainees, and 3,378 are sentenced prisoners. Consequentially, the percentage in this table was calculated on the basis of the whole population in penal institutions.

NETHERLANDS:

As the number of persons aged less than 18 years and between 18 and less than 21 years is known for the whole population held in all types of institutions, percentages were calculated on the basis of total number of prisoners (17,113).

Map 2: Breakdown of the age of criminal responsibility and percentages of prisoners less than 18 years of age in European countries

Reference: Council of Europe, SPACE I 2007.m.2

This map should be used cautiously. Many figures presented in this map are partial, and cannot be compared among countries. Several countries did not provide the general data for the whole prison populations. Therefore, sometimes we used the available data (e.g. only on sentenced prisoner).

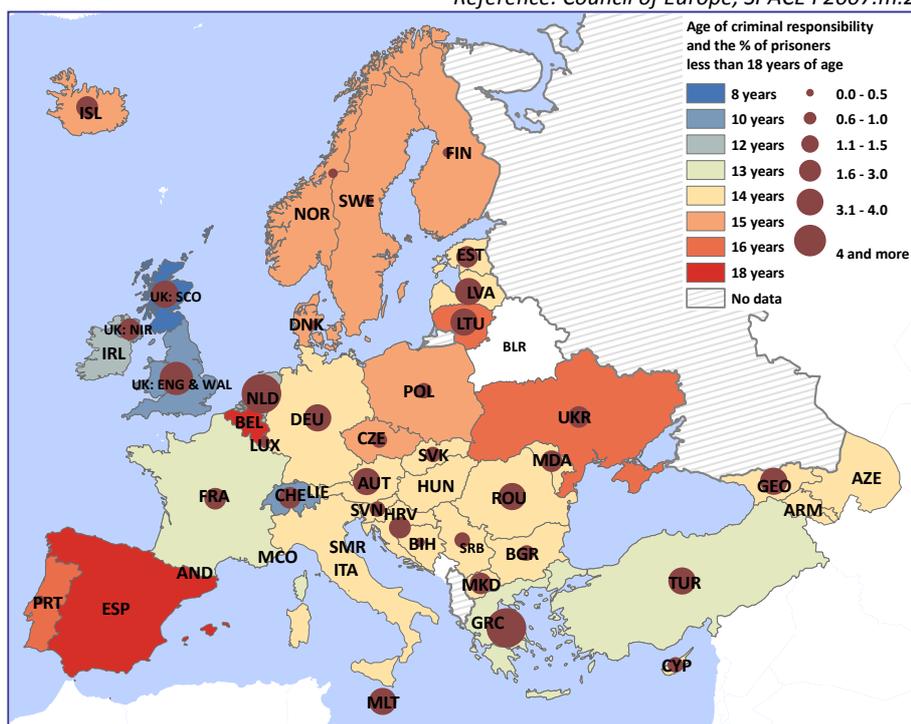

Table 2.2: Median and Average ages of the prison population (including pre-trial detainees) on 1st September 2008

Reference: Council of Europe, SPACE I 2008.2.2

Country	Median	Average
Albania

Minimum	23.1	31.0
Maximum	54.0	50.1

In the following cases, the *average* and the *median* age are based on estimations calculated by the authors of the report on the basis of data provided by national correspondents: **Andorra, Austria, Azerbaijan, BiH: Republika Srpska, Cyprus, Czech Republic, Ireland, Lithuania, Malta, Portugal, and Serbia.**

For five countries only the median could be calculated: **Norway, Romania, Slovenia, Spain (Catalonia), and Turkey.**

Among countries presented in the Table 2.2, 21 do not include persons held in institutions for juveniles in the calculations of the mean and median ages: Andorra, Azerbaijan, Belgium, BiH (St. level), Cyprus, Denmark, Iceland, Italy, Liechtenstein, Luxembourg, Monaco, Netherlands, Norway, Poland, San Marino, Spain (St. level), Spain (Catalonia), Sweden, Switzerland, UK: England and Wales, and Canada.

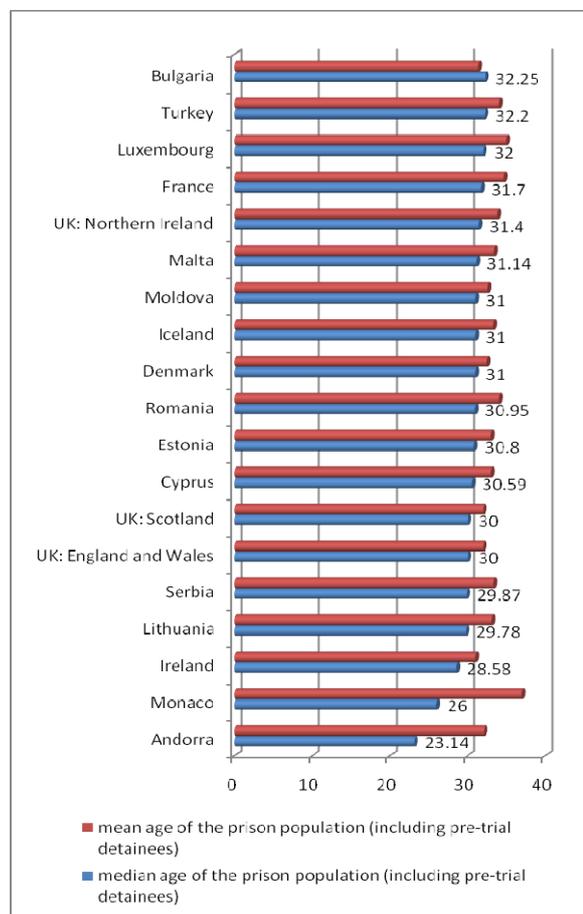

Figure 2.a: Countries with the youngest prison population classified by decreasing median age

Table 3: Structure of prison populations on 1st September 2008: female prisoners and foreign prisoners

- (a) Total number of prisoners (including pre-trial detainees)
- (b) Number of female prisoners (including pre-trial detainees)
- (c) % of female prisoners in the total number of prisoners (including pre-trial detainees)
- (d) Number of foreign female prisoners (including pre-trial detainees)
- (e) % of foreign females in the total number of female prisoners (including pre-trial detainees)
- (f) Number of pre-trial female detainees
- (g) % of pre-trial female detainees in the total number of female prisoners
- (h) Number of foreign prisoners (including pre-trial detainees)
- (i) % of foreign prisoners in the total number of prisoners (including pre-trial detainees)
- (j) Number of foreign pre-trial detainees
- (k) % of foreign pre-trial detainees in the total number of foreign prisoners

Notes – Table 3

AZERBAIJAN:

Figures are on 1st January 2009 instead of 1st September 2008

BULGARIA:

Point (j) -The number in stock (on 1st September 2008) is not available. The number of all pre-trial foreign prisoners (flow during the whole 2008) was **365**.

CROATIA:

Figures are on 31st December 2008 instead of 1st September 2008

CYPRUS:

In this table, the categorisation is based on the number of prisoners held in prisons. Persons held in police stations are excluded.

CZECH REPUBLIC:

Figures are on 31st December 2008 instead of 1st September 2008

ESTONIA:

- Figures are on 31st December 2008 instead of 1st September 2008;
- **Point (d)** –Among the total number of foreign females, 76 were with unspecified citizenship and 16 with foreign citizenship;
- **Point (h)** –Among the total number of foreign prisoners 1,222 were with unspecified citizenship and 252 with foreign citizenship;
- **Point (j)** –Among the total number of foreign pre-trial detainees 352 were with unspecified citizenship and 87 with foreign citizenship.

FINLAND:

Figures are on 1st May 2008 instead of 1st September 2008

FRANCE:

Figures are on 1st October 2008 instead of 1st September 2008

GERMANY:

- Figures are on 31st March 2008 instead of 1st September 2008;
- **Point (d)** –The total number of foreign females is not available; insofar no special figures of foreign pre-trial female detainees are available. The number of the sentenced foreign females is **501**.

LATVIA:

Figures are on 1st October 2008 instead of 1st September 2008

LITHUANIA:

Figures are on 1st July 2008 instead of 1st September 2008

NETHERLANDS:

- **Point (b)** –Figures refer to the population in penal institutions and institutions for aliens only. Total number of prisoners in this category is **961**, of which **814** are for criminal offences, and **147** are administrative aliens.

- **Point (d)** –Figures refer to the population in penal institutions and institutions for aliens only. Total number of prisoners in this category is **326**, of which **197** are for criminal offences, and **129** are administrative aliens.
- **Point (f)** –Figures refer to the population in penal institutions and institutions for aliens only. Total number of prisoners in this category is **368**, all for criminal offences. Among 368 “pre-trial” females, 51 are appealing.
- **Point (h)** –Figures refer to the population in penal institutions and institutions for aliens only. Total number of prisoners in this category is **3,746**, of which **2,408** are for criminal offences, and **1,338** are administrative aliens.
- **Point (j)** –Figures refer to the population in penal institutions and institutions for aliens only. Total number of prisoners in this category is **1,251**, all for criminal offences.

POLAND:

Figures are on 31st December 2008 instead of 1st September 2008

PORTUGAL:

Figures are on 31st December 2008 instead of 1st September 2008

SPAIN (CATALONIA):

Figures are on 31st December 2008 instead of 1st September 2008

SWEDEN:

Figures are on 1st October 2008 instead of 1st September 2008

SWITZERLAND:

Figures are on 6th September 2008 instead of 1st September 2008

UKRAINE:

- Figures are on 1st July 2008 instead of 1st September 2008;
- **Point (b)** –Among the total number female prisoners, 112 were girls aged 14 to 18 years;
- **Point (d)** –Among foreign females 110 were citizens of the CIS (The Commonwealth of Independent States) Member States, and one was Iranian.

UK: ENGLAND AND WALES:

Figures are on 30th June 2008 instead of 1st September 2008

UK: SCOTLAND:

- **Point (h)** – Foreign prisoners are those prisoners who are recorded as having a nationality which is not British. This may not necessarily be an accurate statement of their citizenship status.

Notes – Table 4

AUSTRIA:

- **Point (e)** –In this category are included offenders suffering from mental disorders or certain addicted offenders in especially designed sections of penal institutions; detention for the purpose of extradition, sentences imposed according to the Austrian Fiscal Criminal Code, administrative custody prior to repatriation, and administrative detention.

AZERBAIJAN:

Figures are on 1st January 2009 instead of 1st September 2008

BELGIUM:

- **Point (e)** –The category “Other cases” includes:
 - Mentally ill prisoners kept detained for security reasons;
 - Inmate sentenced prisoners in enforcement of the Law on social protection;
 - Aliens handed over to the Office of the Aliens (illegal aliens held for administrative reasons);
 - Wanderers/beggars handed over to the Government;
 - Recidivists/habitual offenders handed over to the Government;
 - Persons temporarily detained against the revocation of the release on parole;
 - Suspension of the release on parole;
 - Persons temporarily detained against the revocation of the probation.

CROATIA:

- Figures are on 31st December 2008 instead of 1st September 2008;
- **Points (a), (b), and (c)** –It is not possible to keep these groups separate in the statistics;
- **Point (e)** – In this category are included juveniles with educational measures in correctional institutions and prisoners sentenced on the basis of Misdemeanours Act.

CYPRUS:

- **Point (a)** –Total number of untried detainees is 319, of which **134** detainees are held in prisons and **185** are held in police stations.

CZECH REPUBLIC:

Figures are on 31st December 2008 instead of 1st September 2008

DENMARK:

- **Points (a), (b), and (c)** –It is not possible to keep these groups separate in the statistics;
- **Point (e)** –In this category are included **53** detainees held according to the *Aliens Act* and **17** “other” (unspecified) persons.

ESTONIA:

Figures are on 31st December 2008 instead of 1st September 2008

FINLAND:

- Figures are on 1st May 2008 instead of 1st September 2008;
- **Points (a), (b), and (c)** –It is not possible to keep these groups separate in the statistics;
- **Point (e)** –Fine defaulters.

FRANCE:

- Figures are on 1st October 2008 instead of 1st September 2008;

- In this table are presented data on all categories of prisoners (“écrouées détenues”) (those, who are *de facto* held in penal institutions and those who have a status of “detainees”). It is impossible to provide more accurate figures for the separate category of persons *de facto* held in penal institutions.
- **Point (e)** –Legal measures of constraint.

GERMANY:

- Figures are on 31st March 2008 instead of 1st September 2008;
- **Points (a), (b), and (c)** –It is not possible to keep these groups separate in the statistics;
- **Point (e)** –“Preventive detention”. In this category are counted detainees which have already served their sentence, but who are kept in penitentiary facilities for security reasons (*Sicherungsverwahrung*).

HUNGARY:

- **Point (e)** –The category “Other cases” includes:
 - Detention arising from exclusion of the European arrest warrants (8);
 - Detainees under transit process (4);
 - Imprisonment for administrative offences / fine conversion (152);
 - Forced medical treatment and temporary forced medical treatment (182).

IRELAND:

- **Point (e)** –14 Immigration warrants.

ITALY:

- **Point (e)** – In the category *Other cases* are included:
 - Internees (*Internati*) and temporary internees, that are persons held in Judicial Psychiatric Hospitals (*Ospedali Psichiatrici Giudiziari*), which are special penal institutions under the authority of the Penitentiary Administration, managed by a psychiatrist of the Penitentiary Administration. These prisoners may also be held in prison hospitals, as they are executing a security detention measure.
 - 61 inmates to be classified (*da impostare*): on 1st September 2008, it is impossible to input an exact judicial status for these persons.

LATVIA:

Figures are on 1st October 2008 instead of 1st September 2008

LIECHTENSTEIN:

- **Point (e)** –one detainee held for the extradition purposes

LITHUANIA:

- Figures are on 1st July 2008 instead of 1st September 2008;
- **Point (b)** –Following the provisions of the Code of Criminal Procedure, sentenced prisoners after having submitted their written consent are able to start the service of their term of imprisonment before the hearing of their case in order of appeal.

MOLDOVA:

- **Point (e)** – In this category are included **181** prisoners; of which **123** are at the disposal of the prosecuting agencies, and **58** are those who lodged a cassation appeal to the Supreme Court.

MONACO:

- **Point (d)** –The only detention facility in the Principality of Monaco is a remand centre. Only nationals are intended to serve their entire sentence. Aliens who received their final sentence to over six months of imprisonment are usually transferred to the prison of Nice.

These transfers are regulated by an agreement between Monaco and France (Article 14 of the Treaty of Cooperation “*Convention de voisinage*” from 1963).

NETHERLANDS:

- Data are available for the population held in penal institutions and institutions for aliens (see general notes). The total number of prisoners does not refer to persons held in institutions for juvenile offenders and custodial clinics.
- **Point (e)** –The category “Other cases” includes:
 - Illegal aliens (1,660 detainees);
 - Fine defaulters (83 detainees);
 - In extradition (29 detainees);
 - Unknown (191 detainees).

NORWAY:

- **Point (a)** –A person who is sentenced to imprisonment while remanded in custody and appeals against the sentence may remain classified as “remanded in custody” until the appeal is decided. An exception this is where only the length of sentence is appealed against. In such cases the offender may elect to start serving the sentence pending the outcome of the appeal;
- **Point (c)** –In this category are included persons held in prison after being convicted, but have appealed against decision and are registered as “remanded in custody”;
- **Point (e)** –Fine defaulters.

POLAND:

Data relate to 31st December 2008 instead of 1st September 2008

PORTUGAL:

- Figures are on 31st December 2008 instead of 1st September 2008;
- **Point (d)** –Among 8,699 prisoners 256 detainees are under “security measures” (mentally ill persons), of which 86 are placed in special psychiatric institutions or in penitentiary hospitals, and 170 in non-penitentiary hospitals.

SLOVENIA:

- **Point (e)** – The category “Other cases” includes:
 - 23 prisoners are in the Correctional Home (correctional institution) with an educational measure;
 - 11 persons in compliance detention on the basis of Misdemeanors Act.

SPAIN (STATE ADMINISTRATION):

- **Point (e)** –The category “Other cases” includes:
 - Mentally ill persons under “security measures” (563 detainees);
 - Week-end arrests (31 detainees);
 - Fine defaulters (119 detainees);
 - Transits (195 detainees).

SWEDEN:

- Figures are on 1st October 2008 instead of 1st September 2008;
- **Points (a), (b), and (c)** –It is not possible to keep these groups separate in the statistics;
- **Point (e)** –The category “Other cases” includes:
 - Drug addicts;
 - Illegal immigrants awaiting deportation;
 - Persons awaiting placement in psychiatric institutions;
 - Persons who have broken probation rules.

SWITZERLAND:

- Figures are on 6th September 2008 instead of 1st September 2008;
- **Points (c) and (d)** –It is not possible to keep these groups separate in the statistics;
- **Point (e)** –The category “Other cases” includes:
 - Confinement for purposes of assistance within the meaning of Articles 314a and 397 of the Civil Code;
 - Detention in order to proceed to the expulsion or extradition of a person;
 - Persons waiting transfer from one penal institution to another;
 - Juveniles serving sentences of the Juvenile Criminal Law.

TURKEY:

- **Point (b)** –Data provided in previous years under this point was wrong (in 2007 this figure is a right one). In the Turkish criminal justice system, a suspect or detainee can not be found guilty until final verdict. The jury system does not exist in the Turkish criminal justice system.

UKRAINE:

- Figures are on 1st July 2008 instead of 1st September 2008;
- **Point (e)** –Therapeutic-prophylactic center alcoholics, sentenced prisoners in arrest houses, lifers, sentenced prisoners who are continued to be held at the remand prisons and are engaged in providing different services to the pre-trial detainees (cooking, cleaning, laundry etc.), sentenced transit prisoners, sentenced prisoners who wait to be transferred.

UK: ENGLAND AND WALES:

- Figures are on 30th June 2008 instead of 1st September 2008;
- **Point (e)** –Non-criminal population, held for civil offences.

UK: NORTHERN IRELAND:

- **Points (a) and (b)** –It is not possible to keep these groups separate in the statistics;
- **Point (e)** –Fine defaulters and immigration detainees.

UK: SCOTLAND:

- **Point (e)** –One person convicted by military court-marital.

CANADA:

- Figures are on 12th April 2009 instead of 1st September 2008;
- **Point (c)** –There is no data available on the number of appeals, only the total number of appeal outcome decisions (**2,453**). There is no statutory limit on appeals; therefore all sentenced prisoners can appeal their conviction or sentence at any point during their sentence.

Table 5: Legal status of detainees not serving a final sentence on 1st September 2008 (percentages and rates)

Reference: Council of Europe, SPACE I 2008.5

Country	Percentage of prisoners not serving a final sentence (1)	Rate of prisoners not serving a final sentence per 100,000 inhabitants (1)	Percentage of prisoners not serving a final sentence (2)	Rate of prisoners not serving a final sentence per 100,000 inhabitants (2)	Percentage of untried detainees (no court decision yet reached)	Rate of untried detainees (no court decision yet reached) per 100,000 inhabitants

Notes – Table 5

See Notes on Table 4.

In **TABLE 4**, when no data were available under heading (c) "**SENTENCED PRISONERS WHO HAVE APPEALED OR WHO ARE WITHIN THE STATUTORY TIME LIMIT FOR DOING SO**" and no further information was provided, it is assumed that prisoners in that situation are included among those under heading (d) "**SENTENCED PRISONERS (FINAL SENTENCE)**".

In that case, rate (a) "**PERCENTAGE OF PRISONERS NOT SERVING A FINAL SENTENCE**" and rate (b) "**PRISONERS NOT SERVING A FINAL SENTENCE PER 100,000 INHABITANTS**" of **TABLE 5** ARE PRESENTED BETWEEN BRACKETS AND MUST BE USED WITH CAUTION.

In **TABLE 4**, when no data were available under heading (b) "**PRISONERS CONVICTED BUT NOT YET SENTENCED**" and no further information was provided, it cannot be excluded that prisoners in that situation are included among those under heading (a) "**UNTRIED PRISONERS (NOT YET CONVICTED)**".

In that case, rate (c) "**PROPORTION OF UNTRIED PRISONERS (NOT YET CONVICTED) AS A PERCENTAGE**" and rate (d) "**UNTRIED PRISONERS (NOT YET CONVICTED) PER 100,000 INHABITANTS**" of **TABLE 5** ARE PRESENTED BETWEEN BRACKETS AND MUST BE USED WITH CAUTION.

Table 5 includes two different types of calculation for the category of "prisoners not serving a final sentence":

- in the first case (1.a and 1.b) the category (e) ("Other cases") from Table 4 was included, and
- in the second one (2.a and 2.b) this category was excluded.

These adjustments are based on the additional information provided by national correspondents, and which can be found in notes of the Table 4. As a rule, it seems that a great part of the persons included in "Other cases" is to be considered completely separately. Nevertheless, in order to ensure comparability of the data with previous years' reports, we kept both these calculations.

Table 6: Breakdown of sentenced prisoners (final sentence) on 1st September 2008, by main offence (numbers)

Notes – Table 6

ANDORRA:

The main offence rule is not well-defined. Therefore, prisoners sentenced for more than one offence can be counted several times. Total number exceeds the number of sentenced prisoners.

ARMENIA:

The total number of sentenced prisoners (final sentence) has been taken from point (d) of Table 4.

AUSTRIA:

The total number of sentenced prisoners (final sentence) has been taken from point (d) of Table 4.

AZERBAIJAN:

Figures are on 1st January 2009 instead of 1st September 2008

BELGIUM:

- The *main offence rule* is not well-defined. Therefore, prisoners sentenced for more than one offence can be counted several times. Indeed, the information in this Table relates to the number of prisoners with a final *relative* sentence concerning at least one offence of the corresponding category. Therefore the total number exceeds the number of sentenced prisoners. Besides, for 4 prisoners (that are not included in the category “Other offences”) there was no information available on the type of offence.
- “Other cases” –For 8 detainees (not included in this category) the record on the type of offence was missing.

BOSNIA AND HERZEGOVINA (STATE LEVEL PRISON ADMINISTRATION):

Just one pre-trial detention unit, consequently figures on sentenced prisoners are not available for this administrative area.

CROATIA:

Figures are on 31st December 2008 instead of 1st September 2008

CZECH REPUBLIC:

Figures are on 31st December 2008 instead of 1st September 2008

DENMARK:

The category of *Homicide* includes also the particularly grievous assault.

ESTONIA:

Figures are on 31st December 2008 instead of 1st September 2008

FINLAND:

- Figures are on 1st May 2008 instead of 1st September 2008;
- Categories of *Rape* and *Other types of sexual offences* cannot be separated in these statistics: are included all types of sexual offences.

FRANCE:

- Figures are on 1st October 2008 instead of 1st September 2008;
- Categories of *Rape* and *Other types of sexual offences* cannot be separated in these statistics: are included all types of sexual offences;
- Categories of *Robbery* and *Other types of theft* cannot be separated in these statistics.

GEORGIA:

- The *main offence rule* is not applicable. There are many sentenced prisoners for more than one offence. Therefore the total number exceeds the number of sentenced prisoners;
- Moreover there is a lack of the accurate figures because the new statistical system is not yet implemented.

GERMANY:

Figures are on 31st March 2008 instead of 1st September 2008

IRELAND:

In the category of *Other cases* are included criminal damage, public order, road traffic offences, motor vehicle offences, arson, trespass, firearm offences and breach of the peace.

ITALY:

In the category of *Terrorism* are included all types of crimes supplied in the Criminal Code under the denomination of “crimes against the personality of the State”.

LATVIA:

Figures are on 1st October 2008 instead of 1st September 2008

LITHUANIA:

- Figures are on 1st July 2008 instead of 1st September 2008;
- Following legal provisions of the Code of Criminal Proceedings, sentenced prisoners may start serving their term of imprisonment prior to the appeal hearing of the case in court provided they declared their request in written form. This is the reason why sentenced prisoners who have appealed or who are within the statutory limit for doing so, also convicted prisoners, but not yet sentenced included in the present survey are accounted for together with the sentenced prisoners with final sentence and serving their term of imprisonment.

MALTA:

- The *main offence rule* is not applied in Malta. Many residents are sentenced on a number of charges. Figures include all the charges that the residents were sentenced upon;
- *Assault and Battery* –Grievous Bodily Harm cases also included;
- *Rape* –The inmate in this category is sentenced for the “attempted rape”;
- Categories of *Robbery* and *Other types of theft* cannot be separated in these statistics.

NETHERLANDS:

- Data are available for the population held in penal institutions and institutions for aliens (see general notes). The total number of prisoners does not refer to persons held in institutions for juvenile offenders and custodial clinics.
- Categories of *Rape* and *Other types of sexual offences* cannot be separated in these statistics: are included all types of sexual offences.

NORWAY:

- *Terrorism and Organized Crime*- are not themselves classified as offences, but are aggravating elements that may result in longer sentences. It is not possible to quantify these categories of offences;

POLAND:

- Figures are on 31st December 2008 instead of 1st September 2008;
- In the total number of sentenced prisoners (final sentence) were included 367 persons under special measures (“punished”).

PORTUGAL:

Figures are on 31st December 2008 instead of 1st September 2008

SLOVAK REPUBLIC:

The total number of sentenced prisoners (final sentence) has been taken from point (d) of Table 4.

SPAIN (STATE ADMINISTRATION):

- Categories of *Robbery* and *Other types of theft* cannot be separated in these statistics.

SWEDEN:

Figures are on 1st October 2008 instead of 1st September 2008

SWITZERLAND:

- Figures are on 6th September 2008 instead of 1st September 2008;
- The total number of sentenced prisoners (final sentence) has been taken from point (d) of Table 4.

UKRAINE:

- Figures are on 1st July 2008 instead of 1st September 2008;
- Sentenced juveniles (less than 18 years) are not included in the total number of prisoners in this Table.

UK: ENGLAND AND WALES:

- Figures are on 30th June 2008 instead of 1st September 2008
- There were 142 prisoners in the prison population for *Terrorism* offences at the end of March 2008 (<http://rds.homeoffice.gov.uk/rds/terrorism.html>). These prisoners are recorded in other cells of the table depending on the type of offence.

UK: SCOTLAND:

In the category of *Rape* are also included prisoners sentenced for attempted rape.

CANADA:

Terrorism –Such cases exist within the correctional system but no figures are available at this time. There is no clear and complete data extraction method for the total number of offenders serving a sentence for a Terrorism-related crime.

Table 7: Breakdown of sentenced prisoners (final sentence) on 1st September 2008, by main offence (percentages)

Notes – Table 8

Some countries could have included persons sentenced to security measures (mentally ill offenders and persons considered as dangerous) under the category “life imprisonment” because in such cases the length of detention/imprisonment is not fixed. However, as a rule, such persons have been counted under the category “other” (Point L), as it is explicitly stated for Denmark and Portugal.

Several figures are presented between brackets because they do not correspond to the categorization of the length of sentences used in the SPACE questionnaire.

ANDORRA:

- The main offence rule is not applied. The same person sentenced to several prison lengths, can serve them consecutively or not during the period of a given year. Therefore, prisoners sentenced for more than one offence are counted several times. Total number in the distribution exceeds the number of sentenced prisoners.

AUSTRIA:

- **Point (L)** –112 prisoners serve their final sentence instead of being on remand for another crime (§ 173/4 of the Austrian Criminal Procedure Code) or serve a sentence imposed according to the Austrian Fiscal Criminal Code. There are no figures available that display the length of these sentences.

AZERBAIJAN:

- Figures are on 1st January 2009 instead of 1st September 2008;
- **Points (A), (B), (C), (D), and (E)** –Less than 2 years. These categories cannot be separated in these statistics;
- **Point (F)** –2 years to less than 7 years (instead of *3 years to less than 5 years*);
- **Point (G)** –7 years to less than 12 years (instead of *5 years to less than 10 years*);
- **Points (H) and (I)** –12 years and over.

BOSNIA AND HERZEGOVINA (STATE LEVEL PRISON ADMINISTRATION):

Just one pre-trial detention unit, consequently figures on sentenced prisoners are not available for this administrative area.

CROATIA: Figures are on 31st December 2008 instead of 1st September 2008

CZECH REPUBLIC:

- Figures are on 31st December 2008 instead of 1st September 2008;
- **Point (H)** – 10 years to less than 15 years (instead of *10 years to less than 20 years*);
- **Point (I)** – 15 years to 25 years (instead of *20 years and over*).

DENMARK:

- **Point (J)** –The figure on the life sentenced prisoners is on 18th December 2008. This type of data are recorded only once per year.
- **Point (L)** – “*Preventive detention*”: sentence not limited in time and given to persons who are mentally disturbed – 35 prisoners. Prisoners convicted according to *Criminal Law of Greenland* (special measures against mentally ill people and *particularly dangerous* people). These measures have no time limits; though, annually an evaluation is made in order to establish if these prisoners could be released on a trial basis.

ESTONIA: Figures are on 31st December 2008 instead of 1st September 2008

FINLAND:

- Data relate to 1st May 2008 instead of 1st September 2008;
- **Point (L)** – 43 prisoners whose sentences were not yet counted (the administrative process is in process) or prisoners who run away.

FRANCE:

- Data relate to 1st October 2008 instead of 1st September 2008;
- **Points (A), (B), and (C)** – It is not possible to keep these groups separate in the statistics;
- Data relate to the whole of the penal population, and not only on thus who are held in penal institutions.

GEORGIA:

- More accurate figures are missing because of lack to the new statistical system;
- **Points (G) and (H)** – 5 years to less than 15 years. It is not possible to keep these groups separate in the statistics;
- **Point (I)** – 15 years and over (instead of *20 years and over*).

GERMANY:

- Data relate to 31st March 2008 instead of 1st September 2008;
- **Point (D)** – 6 months to 1 year (instead of 6 months to *less than 1 year*);
- **Point (E)** – more than 1 year to 2 years (instead of *1 year to less than 3 years*);
- **Point (F)** – more than 2 years to 5 years (instead of *3 year to less than 5 years*);
- **Point (G)** – more than 5 years to 10 years (instead of *5 years to less than 10 years*);
- **Point (H)** – more than 10 years to 15 years (instead of *10 years to less than 20 years*).

GREECE:

- **Points (A), (B), and (C)** – It is not possible to keep these groups separate in the statistics;
- **Point (E)** – 1 year to less than 2 years (instead of *1 year to less than 3 years*);
- **Point (F)** – 2 years to less than 5 years (instead of *3 year to less than 5 years*);
- **Point (H)** – 10 years to less than 15 years (instead of *10 years to less than 20 years*).
- **Point (I)** – 15 years and over (instead of *20 years and over*).
- **Point (L)** – In this category are included persons detained for debts to the State and foreigners who –although have served their sentence– still are detained waiting for expulsion (expulsion is a criminal sanction enforced after the primary sanction served).

LATVIA: Figures are on 1st October 2008 instead of 1st September 2008

LITHUANIA:

- Figures are on 1st July 2008 instead of 1st September 2008;
- Following legal provisions of the Code of Criminal Proceedings, sentenced prisoners may start serving their term of imprisonment prior to the appeal hearing of the case in court provided they declared their request in written form. This is the reason why sentenced prisoners who have appealed or who are within the statutory limit for doing so, also convicted prisoners, but not yet sentenced included in the present survey are accounted for together with the sentenced prisoners with final sentence and serving their term of imprisonment.

MOLDOVA:

In the Moldavian Criminal Code (art. 70 CPRM) sentences with deprivation of freedom cannot be stated for less than 6 months. However, there exist arrests (art. 68 CPRM) which cannot be included under the same heading.

NETHERLANDS:

- **Point (L)** – 187 prisoners held in different penitentiary institutions. The information about the length of the sentence is not available.

POLAND:

- Figures are on 31st December 2008 instead of 1st September 2008;
- **Point (L)** – In this category are included 3,500 persons serving “substitutive” imprisonment lengths of less than 12 months:
 - up to 30 days: 576 persons
 - from 30 to 120 days: 2,817
 - from 180 days to 270 days: 64
 - from 270 days to 12 months: 43

PORTUGAL:

- Figures are on 31st December 2008 instead of 1st September 2008;
- **Point (L)** – 499 prisoners held in different penitentiary institutions. 56 prisoners sentenced to the indeterminate length, 186 with non-consecutive days of imprisonment, 1 person sentenced to serve in semi-detention, and 256 detainees are under “security measures” (mentally ill persons), of which 86 are placed in special psychiatric institutions or in penitentiary hospitals, and 170 in non-penitentiary hospitals.

SLOVAK REPUBLIC:

- Data relate to 31st December 2008 instead of 1st September 2008. This is the explanation for the difference with previous tables (which relate to 1st September 2008);
- **Points (A), (B), and (C)** – It is not possible to keep these groups separate in the statistics.

SLOVENIA:

- **Point (J)** – Life imprisonment has been introduced by the Parliament as sentence in the Criminal Code in 2008.

SPAIN (STATE ADMINISTRATION):

- **Points (A), (B)** – up to 3 months. In this category are included arrests;
- **Points (C), (D), and (E)** – 3 month to 3 years. It is not possible to keep these groups separate in the statistics;
- **Point (F)** – 3 years to less than 8 years (instead of *3 years to less than 5 years*);
- **Point (G)** – 8 years to less than 15 years (instead of *5 years to less than 10 years*);
- **Point (H)** – 15 years to less than 20 years (instead of *10 years to less than 20 years*);
- **Point (I)** – 20 years to less than 30 years (instead of *20 years and over*).

SPAIN (CATALONIA):

- Figures are on 31st December 2008 instead of 1st September 2008;
- **Points (A), (B), (C) and (D)** – up to one year. It is not possible to keep these groups separate in the statistics.

SWEDEN: Figures are on 1st October 2008 instead of 1st September 2008

UKRAINE:

- Data relate to 1st July 2008 instead of 1st September 2008;
- **Points (B), (C) and (D)** – It is not possible to keep these groups separate in the statistics;
- **Point (H)** – 10 years to less than 15 years (instead of *10 years to less than 20 years*).
- **Point (I)** – 15 years and over (instead of *20 years and over*).

UK: SCOTLAND:

- **Point (L)** – 597 prisoners recalled from supervision/conditional release.

Table 9: Breakdown of sentenced prisoners (final sentence) on 1st September 2008, by length of sentence (percentages)

- (A) – LESS THAN 1 MONTH
 (B) – FROM 1 MONTH TO LESS THAN 3 MONTHS
 (C) – FROM 3 MONTHS TO LESS THAN 6 MONTHS
 (D) – FROM 6 MONTHS TO LESS THAN ONE YEAR
 (E) – FROM 1 YEAR TO LESS THAN 3 YEARS
 (F) – FROM 3 YEARS TO LESS THAN 5 YEARS
 (G) – FROM 5 YEARS TO LESS THAN 10 YEARS
 (H) – FROM 10 YEARS TO LESS THAN 20 YEARS
 (I) – 20 YEARS AND OVER
 (J) – LIFE IMPRISONMENT
 (K) – PRISONERS SENTENCED TO DEATH
 (L) – OTHER/UNKNOWN OR NOT AVAILABLE

Notes – Tables 9, 10, and 11**TABLE 11:**

When figures did not correspond to the categorization of the length of sentences used in the SPACE questionnaire, they were omitted in the calculations of the mean, median, as well as the minimum and maximum figures.

See also notes to TABLE 8.

Figure 2.b: Countries with the highest percentages of prisoners sentenced to less than one year

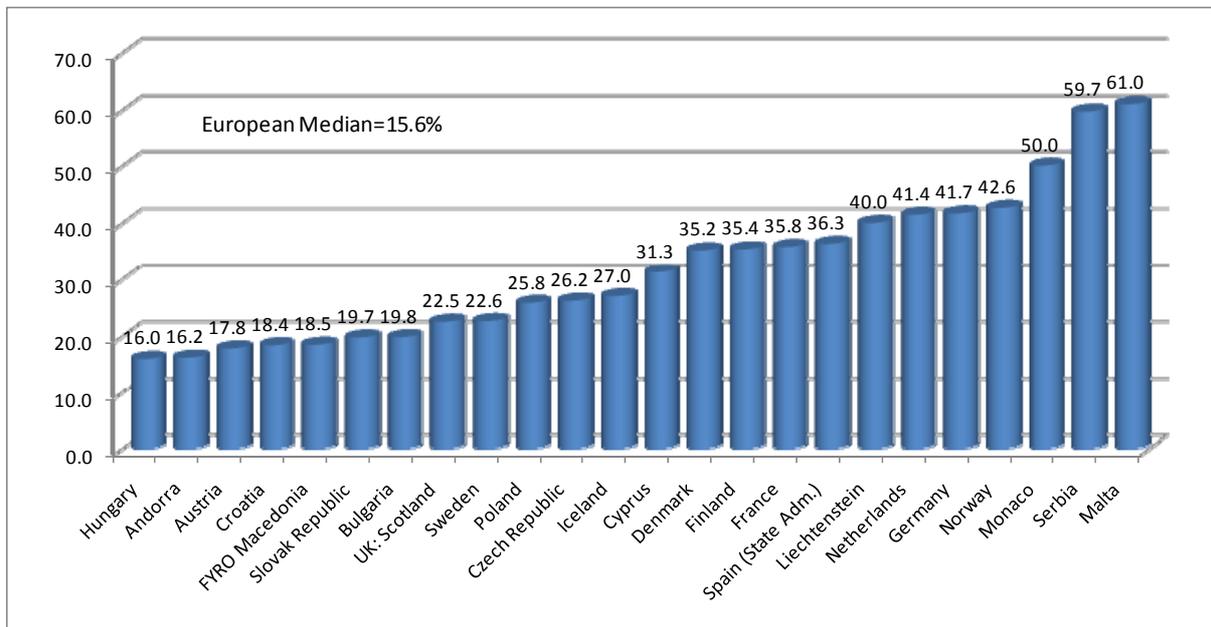

Figure 2.b provides a classification of the countries with the highest percentages of prisoners serving short prison sentences (less than one year). Only countries that are above the European median value (15.6%) are included.

Notes – Tables 12.1 and 12.2

AZERBAIJAN: The total number of entries to penal institutions seems to be very low. No special comments were provided of this figure; therefore it is presented between brackets and should be interpreted cautiously.

BOSNIA AND HERZEGOVINA (REPUBLIKA SRPSKA): Demographic data are mid-2008 estimates. (“Demographic statistics. Statistical Bulletin” no. 12, Republika Srpska Institute of Statistics, Banja Luka, 2008, p. 17), available at: <http://www.rzs.rs.ba/PublikDemENG.htm> (retrieved on November 23rd, 2009).

BULGARIA:

- Figures for these tables are comparable with two previous years’ data, but not with years before 2006. The reason is that before 2006 entries in detention facilities/pre-trial detention have not been counted, only those in prisons.
- *Entries before final sentence* – **26,658**, of which **2,762** in prisons and **23,896** in detention centres/pre-trial detention.

CYPRUS:

- Demographic data used for this report refers to the territory of the Republic of Cyprus. This figure was retrieved on March 14th, 2010 from the Website of the Statistical Service of the Republic of Cyprus (“Population by Age and Sex” Excel file): http://www.pio.gov.cy/mof/cystat/statistics.nsf/populationcondition_en/populationcondition_en?OpenDocument
- *Total number of entries in penal institutions* in 2007 was **11,690**, of which **2,388** were entries in prisons and **9,302** were entries in police stations. For the comparability reasons with previous year figure, in the Table 12.1 are presented only entries to prisons;
- *Entries before final sentence* were **10,409**, of which **1,107** were entries in prison and **9,302** were entries in police stations. For the comparability reasons with previous year figure, in the Table 12.1 are presented only entries to prisons.

DENMARK: It is not possible to provide a separate breakdown on the total number of entries, and entries before final sentence. Only the total number of entries is available.

FRANCE: Demographic data include the European territory of France (known as the Metropolitan France) as well as the French overseas departments (Guadeloupe, Martinique, Guiana and Reunion, known as DOM or Départements d’Outre-mer).

ICELAND:

For information, figures are provided for entries into penal institutions from 1997 to 2006. The reason is that in former figures the counting was per category, and entries before final sentence were not included in the total number of entries.

	1997	1998	1999	2000	2001	2002	2003	2004	2005	2006
Total number of entries	313	334	338	233	295	295	379	387	323	372
Thereof: Number of entries before final sentence	89	57	113	76	89	108	68	117	85	128

LIECHTENSTEIN: According to a treaty between Liechtenstein and Austria, long-term prisoners usually serve their sentences in Austrian penal institutions. For this reason, rates are presented between brackets.

MOLDOVA: The number of *entries before final sentence* seems to be comparatively low. Insofar no special comments of this figure were provided; the percentage of these entries is presented between brackets and should be interpreted cautiously.

NETHERLANDS:

- In the *total number of entries* were included only entries to penal institutions. Entries to the custodial clinics, institutions for juveniles and institutions for aliens were excluded from these figures. In this category are considered entries from, free society and those from police stations into penal institutions;
- *Entries before final sentence* –were included only entries to penal institutions. Entries to the custodial clinics, institutions for juveniles and institutions for aliens were excluded from these figures.
- In the number of *entries transfer from one penal institution to another* are included all transfers between all types of institutions.

NORWAY: *Entries following an escape, after re-arrest by the police* –In this category are also included entries following absconds and failure to return.

SAN MARINO: Under the Criminal Code (Art. 99), a person serving a sentence of at least six months imprisonment in San Marino may be transferred to a “foreign penal institution”, if the competent judge so decides and if there is a relevant international agreement. These prisoners are not included in the San Marino statistics. For this reason, rate and percentage in Table 12.1 are presented between brackets.

SPAIN (STATE LEVEL AND CATALONIA): Demographic data refer to 1st January 2008. Data were retrieved on November 23rd, 2009, available for Spain (State level) and Catalonia at the Website of the National Statistics Institute of Spain: <http://www.ine.es/jaxi/tabla.do>.

- Data in the table for Spain (State Administration) was calculated excluding Catalanian data.

SWITZERLAND:

- In the *total* number of entries are also included the transfers and entries after escapes with a length of more than 7 days;
- In the category of entries *before final sentence* are also included entries in anticipated serving of the sentence of imprisonment or measures.

UNITED KINGDOM (ENGLAND AND WALES, NORTHERN IRELAND, AND SCOTLAND): Demographic data are mid-2008 estimates by National Statistics Online. Data were retrieved on November 23rd, 2009, available (separately for the national levels) at:

<http://www.statistics.gov.uk/statbase/Product.asp?vlnk=15106>

UK: ENGLAND AND WALES: In the *total* number of entries are included exclusively first receptions.

UK: NORTHERN IRELAND: In the number of *entries following transfer from one penal institution to another* are included 16 entries to Northern Ireland. 6 returns to Scotland and England and Wales, are not included in this figure.

UK: SCOTLAND: These figures count *receptions not entries*. “Receptions” are not equivalent to “persons received”. Where a person has several sentences imposed on him by one court in one day this is counted as one reception. However, where custodial sentences are imposed on the same person by 2 or more courts in one day, 2 or more receptions are counted. Where a person is reconvicted while serving and a further custodial sentence is imposed on him this too is regarded as a further reception.

Notes – Tables 13.1

The extremely low figures provided by several countries under heading (a) “*total number of days spent in penal institutions*” shows that this concept has not been understood in the same way by all respondents.

As some countries did not provide data regarding the total number of days spent in penal institutions in 2007 –heading (a) of Table 13.1– and other countries provided figures that did not seem reliable (see notes below), in Table 13.2 we have calculated an alternative indicator of average length of imprisonment (in months) based on the total number of prisoners on 1st September 2006 as an estimate of the average number of prisoners in that year (source: SPACE I 2006).

BELGIUM:

- Prisoners (without taking into account those under electronic surveillance): 3,541,500 days;
- Persons serving their sentence under electronic surveillance: 191,016 days.

CYPRUS:

The total number of days spent in penal institutions is 41,752.6 days, of which 636.6 days spent in prisons, and 41,116 days spent in police stations.

FRANCE:

The number of days corresponds to the number of days spent in all types of penal institutions (including institutions for juveniles, semi-liberty centres etc.).

IRELAND:

Exact figure on number of days spent in penal institutions is not available. The average number of persons in custody on a daily basis during 2008 was 3,544 which gives an approx no. of days spent in our institutions (x365) as 1,293,560.

LIECHTENSTEIN:

The total number of prisoners in Liechtenstein in 2007 was 7 persons. We calculated the indicator of average length of imprisonment, but this number should be used very cautiously, as other prisoners from Liechtenstein serve their sentences in Austrian prisons (see general notes).

NETHERLANDS:

Figures in this table refer only to the population in penal institutions and institutions for aliens. Institutions for juveniles and custodial clinics are excluded. The number of days spent in penal institutions only was **4,778,580**.

SAN MARINO:

The total number of prisoners in 2007 year was 2 persons, but the number of entries is 15. Therefore it is impossible to use these data for calculation of the indicator of average length of imprisonment (Table 13.2) for this country. See general notes.

Notes – Table 14

- (a) Escapes by prisoners (pre-trial detainees or convicted prisoners) from a closed penal institution or during administrative transfer (2006);
- (b) Other forms of escape (from an open penal institution –agricultural colony or other– from semi-detention, or during an authorised short-term absence or leave, etc.) in 2006.

We have specified in the SPACE questionnaire that the counting unit for this Table should be the escaped *persons*. Therefore, when no explicit notes were provided by the national respondents, we assumed that this counting unit has been respected (i.e. the Table refers to *persons* and not *cases* of escape with several prisoners).

AUSTRIA:

- **Point (B)** –257 escapes, of which 37 running off (*Entweichungen*), and 220 are non-return from authorised short-term absence or leave (*Nichtrückkehrer*).

BOSNIA AND HERZEGOVINA (REPUBLIKA SRPSKA):

- **Point (B)** –35 violations of prison leave (non-return from authorised leave is treated as a violation of the granted leave), of which 4 violated privilege to work on the prison farm, 1 violated leave granted for the treatment in hospital, 30 violated prison leave (they were granted a weekend in the city and did not return to prison as agreed).

CYPRUS:

- **Point (A)** –2 persons escaped from closed penal institutions.

DENMARK:

- **Point (A)** – From closed institutions escaped 10 persons, of which 10 from local prisons and 0 from closed prisons. During transfer escaped 11 persons, of which 7 from local prisons and 4 from closed prisons. The total of escaped persons is **21**.
- **Point (B)** – only escapes (**73**) from open institutions are included in this category.

FINLAND:

Counting unit is case instead of person as asked in the questionnaire.

IRELAND:

Counting unit is case instead of person as asked in the questionnaire.

LITHUANIA:

- **Point (B)** –Absence from any type of penal institution (including closed prisons) during authorized short-term absence is not considered as an escape. Therefore, these data are not included in figures presented in this Table.

NETHERLANDS:

Figures refer to the population in the penal institutions. Other categories of institutions (for juveniles, for aliens and custodial clinics) are not considered in the figures of this Table.

PORTUGAL:

- **Point (B)** –Among 196 escapes 14 were from open institutions, 2 from semi-detention, and 180 during the authorized leave. During 2007, 16,028 authorized leaves without supervision have been allowed.

SLOVENIA:

- Counting unit is case instead of person as asked in the questionnaire;
- **Point (b)** – 16 of 34 escapes were recorded in Correctional Home for juveniles.

SPAIN (STATE ADMINISTRATION):

- **Point (b)** – in this category are counted only escapes during the authorized short-term absence from closed and open institutions. Escapes from open centers or sections which are not delivering leave authorizations are excluded from the counting.

UKRAINE:

- **Point (b)** – **325** persons escaped in 2007, of which **153** from open facilities (e.g. agricultural colony), **123** from semi-liberty regime of detention, and **49** within the validity term of the authorised leave from any type of facility (including closed).

UK: ENGLAND AND WALES:

Point (b) – the total number of escapes is 811, of which 545 are absconds and 266 were temporary release failures.

UK: NORTHERN IRELAND:

Point (b) – Twenty seven persons posted Unlawfully at Large (UAL) having not returning from an authorised absence at the specified time. Two are still UAL.

UK: SCOTLAND:

- These figures are for financial rather calendar years (i.e. from 1 April 2007 to 31 March 2008);
- Counting unit is case instead of person as asked in the questionnaire.

CANADA:

Point (a) – Escape committed by a female offender from a Multi-level correctional facility.

Notes – Tables 15.1 and 15.2

NETHERLANDS:

Figures refer to the population in the penal institutions. Other categories of institutions (for juveniles, for aliens and custodial clinics) are not considered in the figures of these Tables.

NORWAY:

- **Suicide** is defined in accordance with the *Nordisk Statistisk* registration rules. If an inmate injures himself in prison and later dies of these injuries outside of the prison (i.e. in or on the way to hospital) then the incident is registered as “in prison”. Cases of overdose are not included unless there are clear indications that the act was intentional;
- Not known if the 2 suicides actually happened inside or outside of prison.

ROMANIA:

- *Does data include detainees who died or committed suicide in hospital INSIDE prisons?* – There were recorded 62 cases, of which 61 deaths and 1 suicide;
- *Does data include detainees who died or committed suicide in COMMUNITY hospitals?* – There were recorded 12 cases, of which 11 deaths and 1 suicide.

UK: NORTHERN IRELAND:

- **Suicides** – 2 inquests yet to be held;
- *Does data include detainees who died or committed suicide in hospital INSIDE prisons?* – Were recorded 1 remanded in custody and 1 sentenced;
- *Does data include detainees who died or committed suicide in COMMUNITY hospitals?* – 1 person died of natural causes in a community hospital (not included in the Total number of deaths).

Notes – Table 16

Data presented in this Table are not necessarily comparable across countries. Indeed, we do not know exactly what is included in the amount presented (meals, services, cleaning etc.). Moreover, the purchasing power varies widely across Europe. Thus, these data should be used very carefully.

CZECH REPUBLIC:

The answer provided is in Euros. For information: exchange rate on 31.12.2007 was 1Euro=26.62CZK.

FRANCE:

- Amounts presented in this Table reflect the operating direct costs of penal institutions. These do not take into account of the transverse expenditures; which include:
 - Expenditures of the Probation and Reintegration services. In the calculations are included expenditures related to socio-educational activities (e.g. sports), vocational training, education and work supported by institutions;
 - Operating costs of the interregional Penitentiary Services (DISP);
 - Several categories of the expenditures bear by the DISP on behalf of prisons;
 - Expenditure of the Central - Headquarters of the Prison Administration;
 - Expenditure of the regional response teams and security.
- **Point (a)** –The average amount calculated for the remand facilities;
- **Point (b)** –The amount spent in detention centres and in prisons.

IRELAND:

- **Point (a)** –268€ for adults, and 1,184.42€ for juveniles;
- **Point (b)** –268€ for adults, and 1,184.42€ for juveniles.

MONACO:

The Monaco's Arrest House, the only detention facility in the Principality of Monaco, is designed for pre-trial detention and for detention of persons serving short prison sentences. Exceptionally, it may be the place of detention of prisoners sentenced to long prison terms. This is an important element to be considered in comparisons.

UKRAINE:

The answer provided is in Euros. For information: exchange rate on 1st July 2008 was 1€=7.63UAH.

UK: NORTHERN IRELAND:

222.61£, which corresponds to 256.38€

UK: SCOTLAND:

It is not directly possible to calculate the cost of pre-trial detention. Figures have been produced using the annual cost of holding one prisoner in custody in 2007. The amount in € calculated on the basis of 2007 exchange rate (1GBP=1.14€).

CANADA:

Point (b) –Average daily cost of maintaining an offender in custody (incarceration) based on Fiscal Year 2007-2008 figures. The calculation includes average costs associated with the operation of the institutions, such as salaries and employee benefit plan contributions, but excludes capital expenditures and expenditures related to Special Operating Agencies such as CORCAN (Employment).

3. Prison Staff

Table 17: Full-time and Part-time Staff working in Penal Institutions on 1st September 2008 –on the basis of Full-time equivalents (numbers)

Notes – Table 17**ANDORRA:**

- **Point (j)** – In this category are employed 12 persons, a great part of them are part-time staff.

CYPRUS:

- **Point (h)** – are counted medical staff and prison warders.

DENMARK:

- **Point (c)** – Staff in regional *Penal Institutions* Administration offices.

FRANCE:

- **Point (d)** – National School of Penitentiary Administration and the Penitentiary Employment Service;
- **Point (e)** – In this category are also included probation staff.

HUNGARY:

- **Point (d)** – 160 (including the number of staff of the Prison Service Training Centre, Prison Service Training and Recreation Centre, Prison Service Department at the Police College;
- **Point (j)** – Figure in this category is 3,756, including 612, which is the number of staff employed by the prison Ltds (specialized companies providing work for the inmates).

ICELAND:

- **Point (a)** – Total number of employees by National Prison and Probation Administration is 15. Nevertheless, 2 psychologists and 2 social workers work mostly inside prisons, therefore they were also included in the **point (h)**;
- **Point (g)** – Total number of prison officers is 82. Among them, 12 are responsible for workshops; therefore they were excluded from **point (g)** and counted under **point (i)**;
- **Point (h)** – Two psychologists and two social workers, all of them situated in the National Prison and Probation Administration, but work mostly in prisons. These staff have been counted in the category of staff at the National Prison Administration (**point b**);
- **Point (i)** – Staff responsible for workshops is part of the custodial staff, but counted in this separate category.

LUXEMBOURG:

Point (b) – In this category is also included Public Prosecutor delegate;

Point (e) – Total authorized staff in both penitentiary centres (Givenich and Luxembourg).

NORWAY:

- **Point (h)** – Most of the treatment and educational tasks are performed by imported services (not included in this point). The 87 persons however are directly employed by The Correctional Service to execute specified tasks. For administrative reasons (e.g. salary scales) some of these have the same formal title as custodial staff.

POLAND:

Figures for this Table are on 30th September 2008 instead of 1st September 2008

SPAIN (STATE ADMINISTRATION):

- **Point (c)** – Last year data in this point referred to civil servants working as administrative staff inside prisons. Nevertheless, it is more accurate to exclude this category, as regional Head Offices do not exist within Spanish Penitentiary Administration;
- **Point (f)** – In this category are included only executives.

SPAIN (CATALONIA):

- **Point (d)** –Staff working in the Courts;
- **Point (f)** –Only executives included (cannot be compared to previous year data because of administrative staff which was included in this point last year;
- **Point (j)** –In this point are included 127 service staff and 460 administrative staff.

SWITZERLAND:

- **Point (b)** –In Switzerland the National Prison Administration does not exist. In this category have been included staff from the Federal Bureau of Justice who perform in the field of sanctions and measures, and regional coordinators;
- **Point (c)** –In this category has been provided the low pitch of the staff required.

UKRAINE:

- **Point (d)** –Special staff (1,834) working in different structural units and training/educational institutions, which are directly subordinate to the central administration of the penitentiary system.

UK: SCOTLAND:

- **Point (c)** –Staff included in this category, is also counted under the **point (e)**. These staff work in prisons, but perform an administrative function only.

Notes – Tables 18.1 and 18.2

In Table 18.1, there are two cases (**ICELAND** and **UK: SCOTLAND**) in which the total percentage of the staff is higher than 100.

ICELAND (NOTE FROM TABLE 17):

- **Point (a)** –Total number of employees by National Prison and Probation Administration is 15. Nevertheless, 2 psychologists and 2 social workers work mostly inside prisons, therefore they were also included in the **point (h)**;
- **Point (g)** – Total number of prison officers is 82. Among them, 12 are responsible for workshops; therefore they were excluded from **point (g)** and counted under **point (i)**;
- **Point (h)** –Two psychologists and two social workers, all of them situated in the National Prison and Probation Administration, but work mostly in prisons. These staff have been counted in the category of staff at the National Prison Administration (**point b**);
- **Point (i)** –Staff responsible for workshops is part of the custodial staff, but counted in this separate category.

UK: SCOTLAND (NOTE FROM TABLE 17):

- **Point (c)** –Staff included in this category, is also counted under the **point (e)**. These staff work in prisons, but perform an administrative function only.

In Table 18.2 the total percentage of staff working *inside* penal institutions is higher than 100 in **NORWAY**. These inconsistencies have not been amended by the national respondents; therefore these data are between brackets.

NORWAY (NOTE FROM TABLE 17):

- **Point (h)** – Most of the treatment and educational tasks are performed by imported services (not included in this point). The 87 persons however are directly employed by The Correctional Service to execute specified tasks. For administrative reasons (e.g. salary scales) some of these have the same formal title as custodial staff.

Figure 3: Percentages of staff working INSIDE penal institutions (1st September 2008) classified on the basis of the “custodial staff”

(Countries with more than 50% of custodial staff)

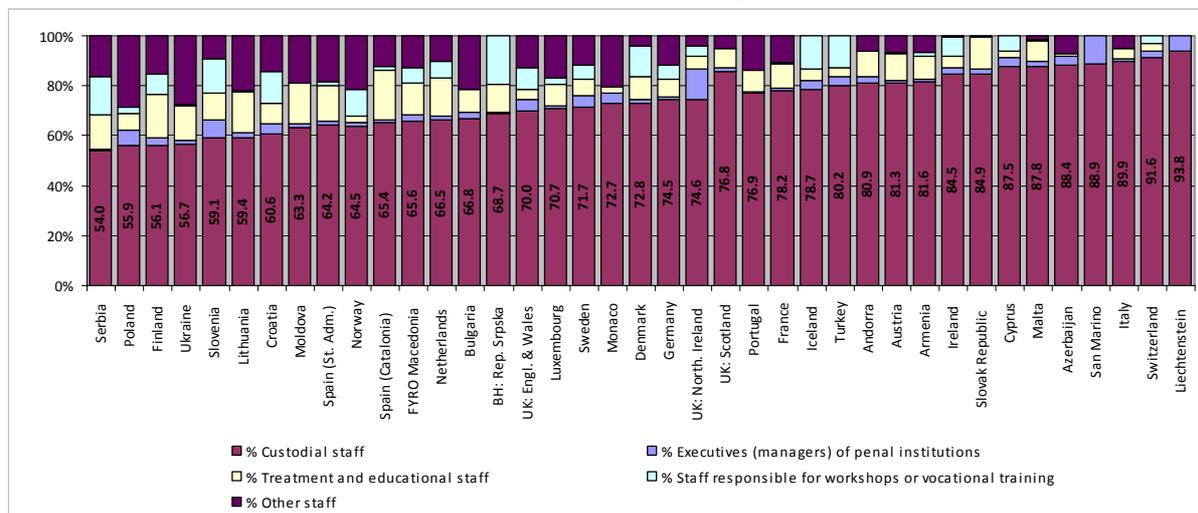

Table 19: Staff working in Penal Institutions but not employed by the Prison Administration on 1st September 2008 (numbers and percentages)

Notes – Table 19

CYPRUS:

Point (E) – There are no independent specialist probation services. Probation services are provided by Welfare Officers who act as Probation Officers (staff employed by Social Welfare Services, Ministry of Justice and Social Insurance) for a specified period (minimum one year and maximum three years) providing the convicted person with necessary support and social network which will prevent recurrent deviant behaviour.

FRANCE:

- **Point (F)** –in this category are included 366 chaplains. This represents 189.78 Full-time equivalents.

GERMANY:

- **Point (F)** – In this category is included staff with administrative tasks, catering service, pastors, temporary workers, cleaning service.

GREECE:

- **Point (A)** – Educators and teachers are employed by the Ministry of Education, however, there are no such data available at the Ministry of Justice.
- **Point (F)** –55 adult probation officers are paid by the Ministry of Justice by they do not work in the prison facilities. They are supervising non custodial sanctions. The same is also true for the 95 juvenile probation officers who are working at the juvenile courts.

HUNGARY:

- **Point (c)** – Total number is 28, of which 20 doctors, 5 nurses and assistants, and 3 psychologists.

IRELAND:

- **Point (B)** – All teachers for adult prison population are supplied by the IVEC (Irish Vocational Education Association).
- **Point (c)** – Dentists are supplied by the Dental Hospital in Dublin.

LITHUANIA:

- **Point (F)** – In this point are also included 49 technicians (engineers in charge of the maintenance of medical equipment, employees working in prison cafeterias and stores, etc.)

LUXEMBOURG:

- **Point (F)** – Private companies staff on hire, temporary workers, and unemployed persons under the reintegration programs, etc.

MALTA:

- **Point (B)** – This figure relates to the whole 2008 year, and includes one educational coordinator.
- **Point (F)** – 22 Police Constables receive their wage from the Police corps.

NORWAY:

- **Point (F)** –In this category are included:
 - 21 activities staff
 - 10 program deliverers
 - 3 cleaners
 - 1 executive in the building field

SPAIN (STATE ADMINISTRATION):

- **Point (b)** – Teachers and educators must be divided into: teachers for formal education (677) and trainers for vocational courses (660).
- **Point (c)** – Data for Doctors and healthcare staff includes:
 - Doctors: 906 effective doctors. Doctors are contracted by Spanish Penitentiary Administration, as civil servants.
 - Healthcare staff: includes Nurseries, porters, technicians for radio diagnosis and for laboratory, pharmacist in charge. All of them are contracted directly by this administration through a Labor contract instead of being civil servants.
- **Point (e)** – Personnel for probation service (379) are referred to staff only working on alternative sanctions and measures. Social workers are directly contracted by this administration through a labour contract, instead of being civil servants. The number of social workers in total is 605, and the number of them working for probation is difficult to say, as they can rotate or change for one position to the other depending on the needs and the criteria of each Penal Institution.
- **Point (f)** – 6803 volunteers from NGOs and other associations and 660 Vocational trainers:

SPAIN (CATALONIA):

- **Point (b)** – Teachers
- **Point (d)** – Catalanian police is in charge of the transfers from one penal institution to another. Moreover, they also manage the perimeter security of the penal institutions. These staffs are cumulating prison charges with other police activities.
- **Point (e)** – Staff from the Institute of Social Rehabilitation, who manage the non-custodial and community service measures.
- **Point (f)** – Staff in charge with working groups/ professional workshops

UKRAINE:

- **Point (b)** – Teachers and tutors

UK: SCOTLAND:

Staff employed through contractors is not directly under the supervision of the Scottish Prison Service. Therefore, numbers in this Table are not available.

Notes – Table 20

See general notes in respective tables.

Many figures calculated in this Table are estimates, and therefore the Table must be used with caution.

The total number of prisoners used in this Table is based on the non-adjusted figures provided in Table 1.

List of Tables and Figures:

TABLE 1: SITUATION OF PENAL INSTITUTIONS ON 1 ST SEPTEMBER 2008	26
